Brief History and Facts on Seed Growing

The growing of vegetable seeds as conducted today is a highly specialized line of agriculture, more so probably than any other line, demanding expert knowledge, and the proper climatic and soil conditions, for the proper maturity of seed crops. In the early days rather haphazard methods prevailed. Professional growers, farmers, market gardeners and beginners put out acreages which they thought they could sell. Following years of scarcity with some seeds, increased acreages were put out the following season, and a surplus ensued. Quality which means a high bred strain of seed did not play a very important part in those days. There was no assurance that a grower would be paid any more for a high class grade of seeds, than just the ordinary run.

Finally the whole system was changed into contract growing. Reputable seedmen placed their contracts for their requirements subject to crop. The seedmen specified what quality or grade he could use, and what particular strain. Reputable seedmen refused to buy on the open market and took only what their contract growers produced. Seed growing was thus thrown more and more into the hands of experts, men who made it their business, for certain varieties and strains adapted to their conditions. The man who had no contract had difficulty in selling. Thus the system of contract growing promptly prevented over-production, and there is probably no business in the world today that is better managed, so far as having the correct production grown than the vegetable seed business. Climatic causes frequently cause under production.

Our strains of sweet corn come from the most critical growers of Ohio, Pennsylvania and New England. Peas are grown under irrigation in the Northwest. The best American strains of cabbage seed come from Long Island and certain strains of cabbage and cauliflower from Denmark. Cucumber and vining seeds come from specialists in the West where climatic conditions are such as to produce a uniform crop of fruits. The Rocky Ford district of Colorado produces the best muskmelon seed. Certain strains of lettuce, carrots, onions, radish, pole and lima beans are grown in California. Wax and green podded beans and some radish seeds from Michigan. Ohio also produces some of the finest onion seed grown in this county.

This brief on seed growing shows that certain varieties and certain species thrive better in certain districts, and further shows that the production in them is better than from seeds produced in less favored sections.

PLEASE READ CAREFULLY BEFORE ORDERING

LOCATION. Our seed business is located in the country upon our own farm between Geneva and Ashtabula on the Cleveland-Buffalo highway, properly called State Market Road No. 2. Having no high city rents to pay, and the other enormous overhead expenses of the present day, means that we are in position to quote reasonable prices and dependable quality, on anything listed in this catalogue.

ORDER EARLY AS POSSIBLE. The earlier orders are placed the better it is for you. Then you will have your seeds, and supplies when ready to plant. Don't put things off to the last minute. Please use the order sheet.

REDUCED EXPRESS RATES. Express companies have greatly reduced their rates on seeds, bulbs and plants. Our customers will find that the reduced rates in many instances are as cheap as freight.

DEPARTMENTS SEPARATE. — Our seed, fruit and plant department is entirely separate. Often plants and seeds on a combined order may be sent 24 to 72 hours before the balance of order is filled. If only part of order is received, please wait two or three days before writing us.

Seeds Postpaid by Mail

In considering our prices please bear in mind that we pay the postage on all flower and vegetable seeds, by the package, ounce, quarter pound, or carton anywhere in the United States. In larger packages we will mail free in the first, second and third zones all vegetable and flower seeds, roots and bulbs to the amount of $2.00 or more, with the exception of peas, beans and corn. On lesser amounts add 10 per cent to cover postage or at least 5c for the first pound, which is the minimum charge. Outside the third zone add postage according to the distance. Quarts of peas, beans, and corn weigh 2 pounds, pints 1 pound; pecks, 15 pounds. Add postal charges for peas, beans and corn according to Parcel Post rates.

To whom it may concern:—
The Ransom Seed Co., have done business with us for a number of years and we have always found them reliable and prompt in taking care of their obligations.

Yours truly,
H. R. PAULKNER, Cashier.

ERRORS.—All possible precautions are taken to avoid this occurrence. Notify us at once if your order is not properly filled, and we will promptly make the necessary corrections. Please keep a copy of your order.

AS TO STOCKS OFFERED. — Our seed stocks are pure, fresh and clean, tested for germination. The vegetable and flower seeds come from the world's master seed growers, all 1919 crop. On the ground of quality, service and price we solicit your orders.

FIELD SEEDS.—The price of field seeds is constantly changing. It is impossible to print a guaranteed price for the season. When ready to buy send us your list, and we will quote you lowest price with samples by return mail. You will find we are in position to save you money.

IF MARKET GARDNERS wanting seeds in bulk, in larger quantities than are priced in this catalogue will send us their list, we will be pleased to quote. This catalogue has to go to the press before we are certain as to delivery from our growers. Please send your list in and prices will go forward by return mail.

TO FIND OUT HOW MUCH THE SEEDS WILL WEIGH. Add up the weights of the seeds over one ounce, calling a pint one pound, and quart two pounds each. Packets and ounces need not be considered as we make no extra charge for postage on these.

NOTE our seeds postpaid by mail offer on insert inside front cover.

To places in the second and third zones packages weighing 70 pounds can be mailed. To all other zones only 50 pounds can be sent in one package. Larger amounts of seeds can be sent by making two or more packages, but will go cheaper by express.

Bulbs, roots, plants, etc., will not be sent out until danger of freezing is past, but should be ordered early as stocks of many kinds are scarce.

Liberty Bonds and War Savings Stamps accepted same as cash for any article in this catalogue.

Garden Guide. New edition, enlarged and improved. The amateur gardener's handbook. Compact and complete. Professionals solve every problem of the soil, thereby making GARDEN GUIDE that reliable instructor gardeners have been looking for. Contains exhaustive chapters on the Home Vegetable Garden, Flower and Fruit Gardens, with many original plans. Pruning, Propagation, Fertilizers, Insect Pests, Planning the Home Grounds, Favorite Flowers, Bulbs, Trees, Shrubs, Rustic Furniture, Tools, Birds, Canning, and 1001 other garden factors all covered. It is of upstanding value to every man or woman interested in gardening, regardless of the amount of land at their disposal. Splendid features of Garden Guide are the layouts (plans) for vegetable, flower and fruit gardens. Real workable plans far superior to those which go the rounds of the press. Contains 336 pages and 275 teaching illustrations, with beautiful cover in four colors. Seven expert specialists have written Garden Guide.

Price, Paper Cover, $1.00; Cloth, $1.50, Postpaid

Do Not Overlook Our Offerings of Bulbs, Etc., at Back of Catalogue
Selected Field Corn

NORTHERN GROWN SEED

Our strains of corn are not the ordinary kinds usually on the market. Special attention is paid to the selection of stock in all lines of farm seeds. Do you realize where the old unselected seed is used, the average crop per acre is only half compared to the intelligent selection of strains. Our stock is selected for size of ear and fodder, which means a considerable increase in crop. Buy farm seeds that are dependable. Do not experiment. Buy only proven varieties of the highest possible quality. The best is the cheapest.

Improved White Cap—We consider White Cap the best all around field corn grown. On thin land no other variety will do as well, while on good soil it makes a wonderful yield. It is a variety sure to ripen, maturing in 95 to 110 days. Resists heat and drought wonderfully, fodder is abundant and of superior quality. This is not a pretty show corn, but it certainly will yield. We have a splendid strain of this seed grown within four miles of Lake Erie. Prefer to ship it in the ear. White Cap makes a splendid ensilage corn for points north of us for those who want silage rich in grain.

Peck, $1.25; Bushel, $4.00

Minnesota No. 13—A fine type of early yellow dent. Handsome ears bearing 16 to 20 rows of rich yellow wedge-shaped kernels, packed closely on the cob from butt to tip. Ear average eight inches in length, usually two to a stalk. Thoroughly mature in 95 days on favorable soil.

Peck, $1.50; Bushel, $5.00

Pride of the North—Ears run eight to ten inches, closely set kernels, 16 rowed, matures in 90 days. The cob is very small and red, six to eight foot stalks. In a test 70 pounds of ears produced 60 pounds of shelled corn, instead of 14 pounds of ears the usual proportion with the big cob varieties.

Peck, $1.50; Bushel, $5.00

Reid Yellow Dent—Grown in Northern Ohio. Desirable to plant for either grain or ensilage. So well known, this variety hardly needs a description here. Matures in about 110 days.

Peck, $1.50; Bushel, $5.00

ENSILAGE CORN

Blue Ridge Ensilage—Our seed is the genuine Blue Ridge grown. The yield is immense with this variety, stalks growing 15 feet high, and rich in grain. This is one of the finest ensilage corns grown. The seed is butted, tipped and graded, comes all ready for the planter. Every one of our customers who have used this corn speaks in the most favorable terms of it. You will make no mistake in planting our Blue Ridge Ensilage.

Peck, $1.25; Bushel, $5.00

Red Cob Ensilage—Used freely in the West and North for fodder and ensilage purposes on account of its large growth of leaf and stalk. Also sold under a good many other names.

Peck, $1.00; Bushel, $4.00

Learning Fodder—A large growing variety producing an immense amount of fodder, forming large ears which in this latitude develop into the proper stage of ensilage in about 100 days.

Peck, $1.00; Bushel, $4.00

MILLETS

German or Golden—If sown in July will make a good heavy growth of hay, suitable for cattle. Sow 50 pounds seed per acre. Price on application.

Hungarian—Makes a finer hay and better quality than German. Will make a crop quicker than any other millet. Sow 50 pounds per acre. Price on application.

Japanese—The largest variety of millet growing six to eight feet high. Especially valuable on low land. The hay is relished by horses, cows and sheep. Sow at corn planting time, 12 pounds of seed per acre. Price on application.

Sudan Grass—Introduced by the U. S. Department of Agriculture. Valuable for hay and ensilage. If left to mature grows six to eight feet high, but if cut when half grown two cuttings can be obtained, and the hay is of excellent quality. Sow broadcast ten pounds of seed per acre. Price on Application.
Miscellaneous Farm Seeds

Bugs Extra at Value. Send in list when ready to buy for latest prices

Canada Field Peas.—They are used for grain, green forage, cured hay or pasture. Peas have a high feeding value, and are great soil improvers. Sow with oats one bushel of each per acre, add five pounds of rape, and you have an excellent hog pasture. Treat your peas with inoculation and the yield of both peas and oats will be increased. **Peck, $1.50; Bushel, $5.75.**

Dwarf Essex Rape.—Imported seed. All farmers and poultrymen who keep cattle, hogs, sheep and poultry should sow rape. It is ready to pasture in six weeks, Sow from April to August broadcast five pounds per acre. Five pounds, $1.25; ten pounds, $2.00; 100 pounds, $15.00.

Soy Beans.—Sow at corn planting time from three-fourths to a bushel per acre. Prices of all Soy Beans on application.

Ito San.—This is an early yellow variety, and a good hay producer.

Medium Early Green.—Plant this variety with your ensilage corn. It is excellent for seed and forage, but not quite so early as Ito San.

Mammoth Yellow.—Late maturing, excellent for plowing under as green manure.

**COWPEAS.**

New Era.—Very early adapted to Northern planting.

Whip-Poor-Will.—An early variety, tall, upright, good yielder, highly recommended for hogging down.

Mammoth Russian Sunflower.—Drill the seed at the rate of seven pounds per acre. Fine for moulting hens. Per pound postpaid, 30c; five pounds or more 25c per pound.

Kaffir Corn.—A fine grain for poultry, and the largest grain producer of the cane family. 50 bushels per acre is an average yield. Yields five to ten tons of valuable hay per acre. Drill five to seven pounds per acre, and cultivate like corn.

**SUGAR CANE OR SORGHUM.**

For fodder sow from the first to 15th of June broadcast 30 to 40 pounds of seed per acre, drilled ten to 15 pounds. It is a splendid fodder plant grown extensively for cattle and sheep. For syrup drill four to five pounds per acre.

Sugar Cane for fodder.

Early Amber for syrup.

**EVERGREEN BROOM CORN.**

This is the best variety grown, sow six pounds per acre.

**SAND OR WINTER VETCH.**

Vicina Villosa.—Hardy all over the United States, and will remain green all winter. Exceedingly nutritious, surpassing even several varieties of clover. Succeeds on all soils, while on good soil it makes a rank growth of four to six feet. A great favorite with cattle or any stock. A full crop can be cut in the Spring in time to plough or plant any other crop on the same land. Sow in August or September with clover or rye, or in Spring with oats to support it. Sow 20 pounds per acre. Inoculate the seed. We offer the choicest quality seed. Per pound 40c; five pounds of more, 35c per pound.

**WINTER WHEAT.**

Gladden. Red Wave, Paule, St. Louis Prize. Four of the best strains of winter wheat.

**SPRING WHEAT.**

Marquis.—This variety is early, very productive, and of superior quality.

**BUCKWHEAT.**

Japanese.

Silver Hull.

Common Buckwheat.—Selected seed.

---

**SEED RYE.**

Rosen Rye.—Originated by the Michigan Experiment Station. It is the best winter rye grown.

Spring Rye.—Often sown in place of oats. Makes a good catch crop where winter grain has failed. Per peck, 75c; bushel, $2.75.

**SEED OATS.**

Swedish Select.—An early white variety of good weight and quality, a strong grower, and does well on all soils.

Sixty Day.—One of the earliest varieties growing in the State. The best variety for a nurse crop, as it ripens so early, and has a strong stiff straw.

20th Century.—Early, tall, stiff straw, long heads filled with heavy grain. One of the best oats grown.

**SEED BARLEY.**

Barley is of great value to everyone who feeds stock, either alone or mixed with other feed. 48 pounds to bushel, sow two bushels per acre.

White Halless.—Fast coming into favor in every barley growing section. Kernels are white, large and plump, in feeding value almost equal to wheat, and yields much heavier. Perfectly hardy, and adapts itself to almost any soil, yielding 50 to 60 bushels per acre. The straw is of good feeding value for hay.

Wisconsin Pedigreed.—A six row strain, 'bred up at the Wisconsin Experiment Station. The grain is large, plump and heavy, and the yield is much more than the common kind.

Beardless.—Early maturing, abundant yielder, will do well on any soil where bearded barley can be grown. A fine feeding barley for young stock on account of its freedom from beards.

---

VETCH.—The King of Soil Builders

The immense nodular masses caused by NITRAGIN

---

All Seed Orders We Furnish Comply with the Requirements of the Ohio Seed Law
Grasses and Clovers

We offer only the highest grades of grass and clover seed, which will meet all pure seed laws. Every bag is marked with the purified, approximate weed seeds and germination percentage. If you want this kind of seed write us for samples and prices. Bags are extra at value. Our prices are at all times consistent with the quality offered.

**ALFALFA OR LUCERNE.**

Alfalfa is being more generally grown, as experience is teaching our farmers the proper methods to follow. Once established, it is such a profitable crop that every farmer can afford to take great pains to obtain a stand. It requires cutting at least twice the first season, even if not large enough to make hay. Cutting destroys any weeds that may come up in it and gives the Alfalfa a chance. Must be sown at the rate of 20 to 30 pounds per acre when sown broadcast. Different soils do not seem so difficult to overcome, especially where they can be properly drained, pulverized, sweetened and inoculated.

Alfalfa does not thrive on acid soils.

A liberal dressing of fine ground lime will be found a great benefit to the soil. May be sown from April first to June 15th for the early spring sowing, either drilled or sown broadcast. If broadcast should be made with a light drag or with single stroke of a harrow.

Much seeding is now done later and many prefer sowing from July 15th to September 15th. When seeded late it gives the grower an opportunity to have his land clean and free from weeds, and if weather conditions are favorable a crop is almost assured.

Alfalfa naturally prefers a deep, sandy or gravelly subsoil. Roots from three to ten feet deep and a good stand on properly selected land should yield from three to five cuttings a year.

We offer American grown seed raised in the Northwest and West on non-irrigated land. The best quality obtainable. 60 pounds per bushel.

Grimm Alfalfa.—Good stock of this strain is scarce. It is extremely hardy, and especially adapted for northern latitude. Write for prices.

Alsike.—Very hardy, grows well on wet low land where red clover does not thrive. Excellent for pasture and hay. Write for latest price.

**MELILLOTUS ALBA.**

**Sweet Clover or Bokhara.** (White Flowering).—Will grow on any soil, of great value as a fertilizer. Sweet clover will furnish the soil with bacteria for the successful growing of Alfalfa. Rapidly growing into favor with dairymen and stockmen, as its great value as a pasture and hay crop are now being recognized. For hay cut just prior to blooming. This is a truly a plant which can equal it for pasture, and suffers less from drought than any other plant except alfalfa, which is a soft hay pasture. Sweet Clover can be sown on top of the ground during the winter, letting the frost cover the seed, or early in the spring, with a very scant covering of earth. All seed we offer is hulled and sacified, and of the choicest quality.

**RED CLOVER—MEDIUM**

Medium Red Clover is used very largely to rotate with other farm crops. It adds fertility to the soil and produces two crops. The first is usually cut for hay; the second left for seed or to be plowed under. Extra select stock.

Red Clover—Mammoth or Sapping.—Grows taller and makes heavier growth than Medium Red. Excellent to plow under for green manure. Seed 19 to 12 pounds to the acre.

Crimson Clover.—A quick growing annual. Desirable for pasture or to plow under. Where the winters are not too severe, should be sowed in the fall about 15 pounds to the acre.

Timothy.—One of the most valuable grasses for hay and pasture. Sow six quarts or nine pounds of seed per acre. We can furnish choice reeanned seed at the market price.

Timothy and Alsike mixed.—This makes an excellent mixture to sow either for hay or pasture. As it requires considerable time and expense to separate the Clover seed from Timothy when grown together the mixed seed can be sold cheaper than the two separate. The soil we offer is nice clean seed.

Orchard Grass.—A strong growing, rather coarse grass, good for pasture and hay. Starts very early in the spring. Grows in tufts so should be sown with other early flowering grasses. Tall Meadow Ont Grass is good for this purpose. This grass makes a very rapid growth after being well watered. Grows two to three feet high, and makes very good hay. Finest reeanned seed, weighing 32 pounds per bushel.

Kentucky Blue Grass.—One of the best grasses for pasture and lawns. It starts to grow very early in the spring and remains green late in the fall. It does well in either dry and shady or places that are quite moist. Does not grow tall enough to make large yields of hay.

Red Top.—Valuable for low land, as it is not injured by water. Grows two to three feet high, and makes very good hay. Finest reeanned seed, weighing 32 pounds per bushel.

**Grass Seed Mixtures for Hay and Pasture.**

Grass for hay land. Sow 25 pounds per acre. When ordering state kind of soil and situation where to be sown.

Mixtures for permanent pastures. State kind of soil when ordering.

We are prepared to furnish mixtures both for upland and lowland permanent pastures, composed of varieties best adapted for producing an abundant and nutritious stock supply for stock, and will be found entirely satisfactory for permanent pasture, Sow 50 pounds per acre. Prices on application.
Northern Grown Seed Potatoes

Selected and grown especially for seed purposes. Potato prices are subject to market changes, and are forwarded by express or freight, as directed, purchaser paying charges. We assume no risks on potatoes, and ship directly on purchaser's responsibility. Shipped soon as weather permits in the Spring, in some cases direct from our growers.

Early Rose—We offer the best New York grown stocks. Potatoes are oblong, light red, shallow eyes, yields well, for an early kind and the quality is of the best.

Irish Cobbler—The best extra early white potato now grown. Does well everywhere. Round, pure white, excellent quality.

Improved Green Mountain—Of very high quality for table use. When cooked this variety is white, dry, light and flowery, russet skin. It is a big cropper.

Sir Walter Raleigh—Potatoes are white, round, smooth, excellent in quality and yield.

Dibble's Russet—The best main crop variety now in cultivation. Vines are a rich dark green, very luxuriant in growth. Tubers are round to oblong of good size, flesh pure white covered with russet skin. The Russet is very productive, and the quality is excellent.

Write for prices on Seed Potatoes, stating quantity wanted, as we are unable to quote prices on these when going to press.

---

Master's Rapid Plant Setter

A wonderful labor saving tool for transplanting Cabbage, Tomatoes, Sweet Potatoes, Cauliflower, Egg Plant, Strawberries, and all similar plants. This SETTER was originally designed to set Cabbage Plants but has since been used with great success for many other plants. Each plant is set, watered and covered in one operation. The roots are firmly set by the absorption of the water almost as if they had grown there and every plant will grow, even in the hottest, driest weather. You can set your plants just when you are ready, regardless of the weather.

A Labor Saver

To operate this SETTER you walk along in an upright, comfortable position. There is no stooping or lame backs.

All of the hard labor of setting plants is done away with. It is easy, pleasant work. You can set 5000 to 15000 plants per day and do perfect work. This is more than three times as fast as hand setting. You actually do more in one day than three men can do by hand, so that this SETTER will pay for itself every day it is used. It is the ideal tool for gardeners and should be in the hands of every farmer who has plants to set out. It is now recommended by most of the leading agricultural colleges over all other methods of transplanting. It is strongly built and will last for years.

GROWS BUMPER CROPS of Alfalfa, Clovers, Peas, Beans and Other Legumes

“Nitragin” Increases Yield, Makes Fertile Soil

The simplest, safest and surest system of soil inoculation for all legumes. The lack of necessary bacteria in the soil is often the cause of failure to secure a "catch" of alfalfa, clover or other legumes. "Nitragin" is insurance.

Use a reliable culture. NITRAGIN has been tried out and has made good. It contains strong, active bacteria—which produces nodules and take nitrogen from the air. NITRAGIN is sold in the FINELY GRANULAR MEDIUM and VENTILATED CAN so that the bacteria are good for a long time. INOCULATED legumes give better food and better soil. INOCULATION with NITRAGIN always pays.

USE GARDEN NITRAGIN FOR YOUR GARDEN PEAS AND BEANS
Vegetables of Real Merit

10 SUPERB VEGETABLES FOR THE HOME GARDEN 50c Postpaid

An ideal collection for a small garden, since it embraces the most useful vegetables imaginable, and the varieties offered are the choicest and best. Full-sized, liberal packets are supplied because we want to give customers a chance for a thorough trial of our dependable seeds. If the quality in the vegetables of this collection appeals to you we hope to be favored with a larger order for "dependable seeds" another year.

Bountiful Beans.—This is a flat, green-podded Bush Bean, very early, entirely stringless, extremely tender and of exquisite flavor as a String Bean. Pods contain from five to eight beans each. Nothing finer for a family stringless bean.

Beet, Detroit Dark Red.—A splendid second early beet, tender and sweet and an excellent Winter keeper.

Swiss Chard, Lucullus.—An elegant vegetable belonging to the class of Beets. Swiss Chard does not produce Beet roots, however, but is grown exclusively for its beautiful "savoyed" large leaves, which furnish crisp Spinach greens from early in June until the frost kills the plants. Should be in every home garden.

Carrot, Chantenay.—One of our specialties, earlier than the Danvers, comes more true to type, easily pulled by hand and an excellent Winter keeper, quality of the best. Unsurpassed for a family garden.

Lettuce, Black Seeded Tennis Ball.—The choice of all extremely early "Butterhead" Lettuces. One of the most satisfactory varieties for all seasons planting.

Radish, Scarlet Globe.—One of the earliest best table varieties. Under average conditions ready to use twenty days after planting. Tender and crisp.

Bantam Evergreen Corn—Description below.

Ohio Yellow Globe Onion.—Description below.

Hollow Crown Parsnip.—Sweet and productive.

Purple Top Strap Leaf Turnip.—Fine grained and sweet.

One packet each of the above, 50c

Crosby Egyptian Beet.—A very quick grower, smooth on the outside, which makes it the market gardener's favorite. Dark red flesh, when cooked it gives a deep red color. Packet, 5c; ounce, 20c; ¼ pound, 60c; pound $2.00.

New Kidney Wax Bean.—One of the finest recent introductions. Flat pods, bright yellow, always stringless and brittle at all stages of growth. Packet, 10c; pound 40c postpaid; five pounds or more by express, 25c per pound.

Ohio Yellow Globe Onion.—This is the popular onion with the growers of Ohio and Indiana. Its bulbs are globe shaped, large, and very uniform. Flesh is white of splendid quality, and is an excellent Winter keeper. Possible yields of this variety run up to 800 bushels per acre. Our stock is selected with great care, and is the best possible to obtain. Packet, 10c; ounce, 35c; ¼ pound, $1.00; pound $5.50, postpaid.

Bantam Evergreen.—One of the finest types of sweet corn grown. Comes in just the right season to follow the early sorts. Ears eight to ten inches long of pure rich sweetness. Fodder six to seven feet, very productive. Five dozen ears will more than reap a bushel basket. Customers will make no mistake in growing it. Packet, 10c; pound 35c, postpaid; five pounds or more by express, per pound, 28c.

Red Sunrise Tomato.—Here is a tomato of remarkable earliness, a heavy cropper, a strong thrifty grower. Rich and juicy, unexcelled cutting and eating quality. Excellent for the home or market gardener. Try it and be convinced. Packet, 15c; ounce, 75c; ¼ pound, $2.25; pound, $7.60.
Introductory Remarks

There are few individuals to whom there does not come once in each year a desire to dig in the ground and plant seeds; to be, for the time being, a gardener—"one who tills a place for the cultivation of plants, fruits, trees, etc." The trait is an inherited one since, according to a very old and much revered book, our first progenitor was placed in a garden "to dress it and to keep it." He was the first to practice the art of gardening, "an employment for which no man is too high or too low." It is an ocean, main which can be most beneficially and remuneratively followed. To either the mechanic or office worker an hour or so spent daily in the cultivation of a small plot of land is not labor but rather recreation. No one will deny that home grown vegetables are preferable because of their freshness to those secured from a grocery or meat market and frequently stale.

Several factors enter into the successful raising of desirable vegetables. Most important of all is Good Seed. This, if planted in productive soil, and aided by favorable weather and frequent cultivation rarely fails to reward the gardener most satisfactorily. Compared with time and labor that must be expended upon a growing crop, the first cost of seed (even although it apparently is high) is insignificant. "Recollections of Quality remain long after the price is forgotten." We sell seeds in which we have confidence and base our prices on a fair remuneration for our handling of them. In doing so, we give no warranty, express or implied, as to quality, productiveness or any other matter of any seeds we send out and will not be responsible for the crop.

The quantity of seed required to sow or plant specified areas, depth to plant, distance apart in rows and other useful information may be found in the table on the inside of cover of this catalog. Cultural directions written for the latitude of Chicago are given throughout this book.

GENERAL LIST OF VEGETABLE SEEDS

ARTICHOKE SEED

Sow seeds in April or May in deep, rich, sandy loam with plenty of well-rotted manure. When large enough, transplant into rows three feet apart and two feet in the row.

LARGE GREEN GLOBE. Flower heads can be cooked like Asparagus. Pkt., 5c; oz., 30c.

JERUSALEM ARTICHOKE. The tubers are planted like potatoes, about 3 bushels to acre. They are excellent for feeding stock, especially hogs. Qt., 20c; pk., 75c; bu., $2.50. Special prices on larger quantities.

SPARCEL, Ger. ASPARAGUS Asperge, Fr.

Asparagus Seed should be sown early in spring, on rich, light soil, in drills a foot or more apart, covering the seed an inch deep. Thin to three or four inches and keep the ground mellow and clear of weeds the first season by frequent hoeing. The next spring, transplant to a permanent bed, which should be in deep, mellow soil, made very rich by a liberal application of manure. One ounce will sow 40 feet of drill.

Bonvallet’s Giant This giant variety not only combines high productive power and lasting quality, but it withstands the rust so frequently disastrous to Asparagus beds. Pkt., 5c; oz., 15c; ¼lb., 35c;

COLUMBIAN MAMMOTH WHITE. Produces shoots which stay white as long as fit for use without earthing up or any other artificial blanching. Nearly all seedlings will produce clear white shoots. Pkt., 5c; oz., 10c; ¼lb., 20c;

CONOVER’S COLOSSAL. A standard variety. Popular, productive; good. Pkt., 5c; oz., 10c; ¼lb., 20c;

PALMETTO. A large, dark-green variety. Pkt., 5c; oz., 10c; ¼lb., 10c.

ASPARAGUS ROOTS. See page 26.
DWARF GREEN-PODDED BEANS—Continued

Full Measure A bean of recent introduction that gave much promise of becoming very popular. Medium early, producing an abundance of long, round pods that are stringless, of fine quality and of attractive appearance. When better known we believe it will be well received by both the home gardener and the market gardener. Pkt., 10c; carton, 20c; pt., 35c; qt., 60c.

Longfellow This is an excellent variety to grow for either home use or for the market. It bears profusely and the long, slender pods are attractive to the buyer and their fine quality meet the demands of the most critical. This is a very desirable bean to grow for late planting as it requires less time to mature than almost any other variety. Pkt., 10c; carton, 20c; pt., 35c; qt., 60c.

BLACK VALENTINE. An extra early variety and therefore suitable for late planting. A favorite with the market gardeners both north and south. It is hardy and a good yielder. The pods are almost round, of firm fiber, consequently it is a suitable shipping variety. Pkt., 10c; carton, 15c; pint, 25c; quart, 45c.

RED VALENTINE. One of the best known of the green-pod varieties and planted extensively in the south. It is very hardy and a reliable yielder. Pkt., 10c; carton, 20c; pt., 30c; qt., 50c.

REFUGEE, or 1000 to 1. A late variety, very attractive pods, round and very small, and one of the best canning sorts. Pkt., 10c; carton, 15c; pt., 25c; qt., 40c.

EXTRA EARLY REFUGEE. An improvement on the above on account of its earliness and dwarf habit of growth, in which respect it is distinct from almost any other variety. It is a good yielder, pods uniformly round and nearly stringless, therefore a favorite with canners and shippers. Pkt., 10c; carton, 15c; pt., 25c; qt., 40c.

LONG YELLOW SIX WEEKS. Early, very attractive, long fleshy pods. Pkt., 10c; carton, 15c; pt., 25c; qt., 40c.

EARLY MOHAWK. An old and well-known variety. Early and very-hardy. Pkt., 10c; carton, 15c; pt., 20c; qt., 40c.

Varieties for Shelling

The largest return will result from planting in drills from two to three feet apart and leaving the plants two to six inches apart in the row. Up to the time of flowering they should have frequent shallow cultivation, but any mutilation of the roots by cultivation after the plants come into bloom is likely to cause the blossoms to blast and so cut off the crop. The cultivation of beans should always be very shallow.

LARGE WHITE MARROW. The standard large white Bean commonly sold in market. Beans are good green or dry, of vigorous growth and productive. Pkt., 5c; carton, 10c; pt., 20c; qt., 35c.

WHITE NAVY. Valuable chiefly as a field bean and considered by many the best baking variety. Pkt., 5c; carton, 10c; pt., 20c; qt., 35c.

ROYAL DWARF, or WHITE KIDNEY. Excellent cooked with sweet corn, making "succotash." Among best as a winter bean. Pkt., 5c; carton, 10c; pt., 20c; qt., 35c.

DWARF HORTICULTURAL. Late; productive and much esteemed for good quality of the beans. Pkt., 10c; carton, 15c; pt., 30c; qt., 50c.

DWARF WAX BEANS

Davis Kidney Wax The best early wax Bean for market gardeners. This variety since its introduction, 12 or 13 years ago, has become very popular, especially with truck growers. It is a reliable and exceedingly heavy yielder, with the merit of maturing early and very evenly. The pods are attractive, being long and straight and of a beautiful waxy white that does not discolor in cooking. The flesh is close grained and of fine fiber. The seeds are pure white, kidney shaped and are excellent for cooking either green or dry. Pkt., 10c; carton, 15c; pt., 35c; qt., 65c.

WARDWELL’S KIDNEY WAX. This is another profitable variety for market gardeners to grow for the main crop. Pkt., 10c; carton, 20c; pt., 40c; qt., 70c.
DWARF WAX BEANS—Continued

HODSON WAX. This is a late Bean, but a splendid yielder, one of the largest podded of the wax varieties. It is an exceptionally good Bean for the shipper, the pods holding their form and color a long time after they are picked. Pkt., 10c; carton, 15c; pt., 30c;

CURRIE’S RUST PROOF. A well-known, flat-podded variety, extensively planted in the south. Seeds blush black. Pkt., 10c; carton, 15c; pt., 30c;

MICHIGAN WHITE WAX. This is an excellent recent introduction, called by some a white-seeded Golden Wax. It is an early maturing variety of vigorous growth and a good yielder. The pods are attractive for the market and of fine quality. The dry beans are also very good for cooking. Pkt., 10c; carton, 15c;

POLE BEANS—Continued

GOLDEN CLUSTER WAX. Long, broad, thick pods, borne in clusters. Pkt., 10c; carton, 20c; pt., 35c;

SCARLET RUNNER. A favorite, both as a Snap Bean and for its flowers, which are of a bright scarlet. Seeds broad and kidney-shaped. Pkt., 5c; carton, 10c;

LAZY WIFE. This is a superior variety for the home garden, also as a field bean among corn. Desirable either for cooking in the pod or shelled for winter. The large, green pods are from 4 to 6 inches in length. Very tender, of delicious flavor. They are broad and thick, and are stringless until quite large. Dry beans are round, pure white. Pkt., 10c; carton, 15c; pt., 35c;

CUT SHORT, or CORN HILL. An old variety that is in favor for planting among corn. It will yield a good crop without the use of poles. Beans nearly oblong, cut off at the ends, white and partially dotted with spots. Pkt., 5c; carton, 10c; pt., 35c;

DUTCH CASE KNIFE. This is also used as a cornhill bean. Pods long and flat; beans flat, kidney shaped, white, of excellent quality green or dry. Pkt., 10c; carton, 20c.

POLE LIMA BEANS

Lima Beans are not only profitable as green shell beans, but are also a paying crop to sell as dried beans during winter. They are always in demand and bring good prices. Lima Beans will not grow until the weather and ground are warm; if planted earlier, the seeds are apt to rot in the ground.

KING OF THE GARDEN LIMA. Vines vigorous and productive, producing a continuous bloom and fruitage to the end of the season. The pods are of enormous size, many specimens measuring from 5 to 8 inches, and some containing seven beans to the pod, all perfectly formed and of superior quality. Pkt., 10c; carton, 20c; pt., 30c.

DWARF LIMA BEANS

Bush Limas should be planted three feet apart, dropping two or three beans fifteen inches apart in the row. Cover about an inch deep. Dwarf Limas require no support.

PENCIL POD BLACK WAX. Medium early. Pods round and pencil shaped. Pkt., 10c; carton, 15c; pt., 30c;

CHALLENGE BLACK WAX. The earliest of all, very dwarf in habit of growth. Pods are round, attractive in color, and crisp and tender in quality. Pkt., 10c; carton, 15c; pt., 30c;

GOLDEN WAX. An old, standard variety, hardy and early. Pods flat. Seeds white blotched with reddish purple. Pkt., 10c; carton, 15c; pt., 30c;

REFUGEE WAX. Hardy, round podded variety, good for canning. Seeds brown and black mottled, similar to Refugee Green Pod. Pkt., 5c; carton, 20c; pt., 35c.

POLE BEANS

Pole Beans are even more sensitive to cold and wet than the dwarf varieties, and should be sown two weeks later. After settled warm weather, set poles four to eight feet long in rows four feet apart and extending north and south, the poles being three feet apart in the row. Around each stake plant five to eight beans, two inches deep.

One quart will make about 100 hills.

KENTUCKY WONDER, or Old Homestead. Pods green, nine inches or more long, nearly round, fleshy, stringless, and of excellent flavor. Dry beans, long, oval, dun-colored. It is an early and most prolific variety. Pkt., 10c; carton, 20c; pt., 35c; qt., 60c.

BURPEE’S DWARF LIMA. Plants make perfect bushes from eighteen inches to two feet high. They are hardy croppers and immense yielders. Pods as large as those of the Pole Lima, and contain three to five beans of the best quality. Pkt., 10c; carton, 15c; pt., 35c;

DREE’R’S DWARF LIMA. Thick pods and large thick beans, three or four in a pod. Ripens fully ten days earlier than the Pole Lima of same name. Pkt., 10c; carton, 20c; pt., 35c;

HENDRISON’S BUSH LIMA. Valuable on account of extreme earliness. Extremely productive, tender, and delicious. The dry beans are small and white. The best variety to use for canning. Pkt., 5c; carton, 20c; pt., 35c;

FORDHOOK BUSH LIMA. This is an excellent bush Lima bean for the home garden. It is a type between Burpee’s and Dree’r’s. Pkt., 10c; carton, 20c; pt., 35c; qt., 60c.

Prices on pints and quarts do not include postage. Add 5c to pint, 10c to quart.
CATALOG OF VEGETABLE SEEDS

RUNKELRUEBEN, Ger.

Sow as early in the spring as ground can be worked, and in drills twelve to fourteen inches apart, and when well up thin to from four to six inches. The young plants removed in thinning are excellent cooked in the same manner as Spinach. Take up the roots in October and store in cellar like potatoes. Covered with sand they will keep in nice, tender condition for winter use.

One ounce will sow 50 feet of drill; 5 to 6 pounds are required for an acre.

Crosby's Egyptian. Much in demand by market gardeners for forcing and early out-of-door sowing. This beet is perfect in shape, and deep-red, almost black, in color. Equally good for early bunching as well as the full market. Its fine color and superior quality make this one of the best beets. Pkt., 5c; oz., 20c.

**BEETS**

**HALF-LONG BLOOD.** One of the best beets for winter and spring use. The roots are pear-shaped, smooth, and handsome; flesh a rich dark red, crisp, tender, sweet, and retaining its excellent quality longer than any other sorts. Pkt., 5c; oz., 10c.

**IMPROVED LONG DARK BLOOD.** Tops large, necks small, leaf stems and vines red, leaf green, roots large, tapering, growing even with the surface. Flesh dark red, zoned with lighter shade, tender and sweet and remaining so when kept till spring. Pkt., 5c; oz., 10c.

**DETOIT DARK RED.** A medium early globe-shaped beet of excellent quality. It is especially esteemed on account of its dark-red color which extends entirely through the beet, and without the light-colored rings seen in some varieties. The beets are smooth and handsome. Pkt., 10c; oz., 20c; ½ lb., 60c.

**SWISS CHARD, or Sea Kale Beet**

It is superior to the common beet for greens; if sown at the same time, it will be fit for use before it. Later, the plants form broad, waxy-like stems to the leaves, which are very delicious cooked or pickled. They have a flavor similar to spinach. Pkt., 5c; oz., 10c.

**MANGEL-WURZEL and SUGAR BEETS**

One ounce for 50 feet of drill; 5 lbs. for an acre.

**MAMMOTH LONG RED.** On good soil sometimes grows eighteen inches long. Dark leaves; skin bright dark red; flesh white with veined rings of rose-pink. An excellent keeper; nutritious and milk-producing. Oz., 10c; ½ lb., 25c.

**GOLDEN TANKARD.** A yellow-fleshed variety highly prized by dairymen for milk-producing qualities. Oz., 10c; ½ lb., 25c.

**CHAMPION GLOBE.** The best round Mangel. It is valuable for shallow soils, a better keeper than Long Red. Oz., 10c; ½ lb., 25c.

**THE BEST SUGAR BEETS**

**KLEIN WANZLEBEN.** White flesh. Contains much sugar. Oz., 10c; ½ lb., 25c.

**LANE'S IMPERIAL SUGAR BEET.** Forms a large root, long and tapering. Snow white flesh. Oz., 10c; ½ lb., 25c.

**BORECOLE, or Kale**

**DWARF GERMAN, or GERMAN GREENS.** A dwarf variety, rarely exceeding 18 inches in height, but spreading out under good cultivation to 3 feet in diameter; the leaves are very beautifully curled, and of a bright green. Pkt., 5c; oz., 20c; ½ lb., 60c. lb. $2.00.

**GREEN CURLED SCOTCH.** About two feet high. Pkt., 5c; oz., 15c.

**BROCCOLI, Fr. BROCCOLI** Spargelkohl, Ger.

Taller and more hardy than Cauliflower, but otherwise very similar to that delicious vegetable. Culture and use are identical with that of Cauliflower.

One ounce of seed for 2,000 plants.

**EARLY PURPLE CAPE.** Pkt., 5c; oz., 30c; ½ lb., $1.00.

**WHITE CAPE.** Pkt., 5c; oz., 30c; ½ lb., $1.00.

**BRUSSELS SPROUTS**

These are miniature cabbages produced from the side of the stalk. They are regarded as a great delicacy boiled and served in the same manner as Cauliflower. Sow in seed bed in May, transplant and cultivate like cabbage. Pkt., 5c; oz., 15c.

---

To pound rate add for parcel postage. Smaller quantities, postpaid, at prices named.
CARROTS

For Market or Home Garden

This is a vegetable deserving to be more generally cultivated, both for use upon the table and for stock feeding purposes. There is no more healthful root crop.

For early, sow in spring as soon as ground can be worked, in drills 15 inches apart, covering one-half inch. For the main crop, sow from the middle of May to the first of July. Thin out in row from 5 to 6 inches apart. Hoe often and deeply between the rows. Light, sandy loam, richly manured, is the best soil.

One ounce will sow about 125 feet of drill.

Barnard’s Improved Danvers

This is a splendid strain which produces a fine, broad-shouldered carrot about ten inches long, very uniform in shape. Color is a handsome orange red. Skin smooth with very few indentations. In quality it has no superior. The flesh is close grained, sweet and of good flavor. It is the favorite carrot with our market garden customers. An enormous yielder, and therefore a valuable carrot for stockmen as well as the garden.

Pkt., 10c; oz., 20c; ½lb., 50c.

Ox Heart, or Guerande. Much esteemed either for family use or market. It is intermediate between the half long and horn varieties. Roots are about six inches long, cylindrical in shape, and rich orange color. The flesh is fine grained, little long, 15c;

Half Long Scarlet, Pointed. Much used for bunching, especially when young; of fine quality, medium early. Pkt., 5c; oz., 15c;

Early Scarlet Short Horn. Short, nearly round, good for shallow soil. Adapted for forcing for market and culture for early home use. Deep orange in color, flavor excellent. Pkt., 5c; oz., 15c;

Danvers, Half Long. A smooth, well-formed carrot, which grows to medium size, tapering to a point. Valuable for a feed crop. Flesh orange color. Pkt., 5c; oz., 15c;

Half Long Scarlet Nantes. An early stump-rooted variety about six inches long, that is valuable for table use. Flesh red, little core. Pkt., 5c; oz., 15c;

Carrots for Stock Feeding

For feeding horses and milch cows, carrots are unsurpassed. Four pounds of seed required for an acre.

Improved Long Orange. Requires deep soil; plants should stand 8 inches apart in 18-inch drills for roots to attain full size. Pkt., 5c; oz., 10c;

Large White Belgian. Grows one-third above ground. Root pure white, green above ground with small top; flesh rather coarse. Pkt., 5c; oz., 10c;

Cauliflower

Blumen Kohl, Ger. Choufleur, Fr.

Cauliflower succeeds well in any soil where cabbages will grow. It delights in a rich soil and plenty of water. For early sorts, sow in a hotbed in February or March; for later crop, sow in May in a moist place. Transplanting should be done in moist weather. One ounce of seed for 3,000 plants.

Extra Early Dwarf Erfurt Best for For- cing. Good for open ground. Dwarf and very solid, with short outside leaves. Can be planted 20 inches apart each way and forced. Almost as early as Snowball. Our strain of seed is very choice. Pkt., 20c; ½oz., 75c;

Barnard’s Snowball

For main crop and for every pur- pose except for first early, or for culture under glass (for which we recommend the Extra Early Dwarf Erfurt) we emphasize Barnard’s Snowball as a variety of the highest quality and reliable, sure cropping strain. Pkt., 20c; ½oz., 75c;

Extra Early Paris. Still used by some gardeners. Pkt., 5c;

½oz., 30c; oz., 50c.

Denmark. A favorite second early and main crop sort. It makes large and fine heads. Pkt., 10c;

½oz., 50c; oz., $1.50.

Autumn Giant. Late; vigorous grower. Pkt., 5c; ½oz., 30c;
CABBAGE

CABBAGE SEED is grown under the care of practical, painstaking and reliable men; in localities where experience and thorough tests have proved the climate and soil to be the best adapted to their production in highest perfection; from fully developed, perfect heads, carefully cured and stored until time of planting; thoroughly tested as to vitality, our seeds can but give satisfaction, and we unhesitatingly recommend it for the use of either market or private gardener.

All that Cabbage requires is the soil to be rich, deep, well-drained, and abundantly manured. For the early kinds, plant 30 inches between the rows and 16 inches between the plants. For the late kinds, three feet between the rows and two feet between the plants. For very early use, sow in January or February, in hotbeds. Set out when the plants are strong enough into other hotbeds, or set in cold-frames in March. Transplant when danger from frost is past to the open ground. For a succession, sow in the open ground last of March or early in April. The late or winter crop seed can be sown in May and the plants set out in July. An ounce of seed produces 1,500 plants; one-half pound to transplant for an acre.

HOW TO DESTROY CABBAGE WORMS. Stro Stor can be used lightly or heavily and the cabbage suffers no harm. The cabbage forms its head by the interior growth; it throws off its earlier and outside leaves, and no dust can enfold within its head. Apply Stro Stor with a duster, stirring it over the plants or full-grown cabbages. The powder is very fine and goes a long way in field or garden.

Copenhagen Market This is very heavy and solid, like the "Ballhead" type of cabbage; makes a fine, large, globe-shaped head with well-developed outside leaves, but is very much earlier in maturing than any of the Danish Cabbages, in fact as early as Early Jersey Wakefield, and will give a much heavier yield per acre than that variety. It is short-stemmed, the heads being produced almost on the ground. The leaves are tightly folded around each other, which permits close setting of plants. The heads mature all at the same time. Pkt., 10c; oz., 75c.

GLORY OF ENKHIUZEN. A very good cabbage. Medium in size, forms a ball-shaped head which is very firm and of good keeping quality. Matures about two weeks later than Copenhagen Market. This is a desirable cabbage for home use. It is a valuable second-early for those who grow for the market. Pkt., 10c.

ALL HEAD EARLY. Heads flat, deep, and solid; valuable also for late. Seeds sown in July and set out in August will make fine heads. Largely planted by market gardeners. Nearly 10,000 can be grown on an acre, and almost every one will head. Pkt., 10c; oz., 75c.

EARLY SPRING. The first early round-head Cabbage, maturing about the same time as Jersey Wakefield. One of its chief claims to superiority is the remarkable uniformity of the heads. They are also very solid, even when young. Pkt., 10c.

EARLY SUMMER. Matures about ten days later than Early Jersey Wakefield. Heads are large, nearly round, somewhat flattened. Pkt., 10c; oz., 75c.

Winningstadt An old and famous type of second-early cabbage. It makes a large, conical head, about ten days later than Wakefield. Color, a bright, glossy green. Valuable not only for early use, but as a winter cabbage. A vigorous grower, it thrives even under unfavorable conditions. Pkt., 10c; oz., 60c.

Early Jersey Wakefield Long recognized as the best, earliest marketable cabbage. In size, medium; in shape, pyramidal with pointed peak. Its uncommonly fine heading qualities, together with its fitness for wintering in cold frames, pleases the most critical gardeners. Our strain of seed is of superior quality. Pkt., 10c; oz., 75c.

LARGE WAKEFIELD, or CHARLESTON. The heads are similar in form, although generally not so pointed, but of equal solidity as the original Jersey Wakefield, while they grow half again as large, reaching full size about ten days later. Pkt., 10c; oz., 75c.

CABBAGE PLANTS

At the proper season, we shall have ready for delivery all the leading varieties, both early and late.
CABBAGE, continued
Second Early, or Main Crop
ALL ROUND FLAT HEADS
ALL SEASONS. A splendid main crop sort, much grown by market gardeners; is also an excellent variety for home use. Remarkable for its ability to stand hot sun and dry weather. Makes solid, hard heads, of large size. Pkt., 10c; oz., 75c.

FOTTLER'S IMPROVED BRUNSWICK. We have a superior strain of this seed, which brings large, flat, solid heads of excellent quality. Stem very short. A sure header. Pkt., 5c.

Chicago Market Cabbage
This valuable Cabbage continues to give the utmost satisfaction, not only to Chicago gardeners, but in every locality in which it has been introduced. We have yet to find a variety more thoroughly adapted to general culture and which combines so many good qualities as our "Chicago Market" Cabbage. It will surely please you. Planted early, it develops fine, large, solid heads one week later than the Wakefield, while if set out later it makes excellent heads for winter use. It stands the hot sun well, is almost certain to head, and does not crack; is an excellent keeper. Pkt., 10c; oz., 75c.

AUTUMN AND WINTER SORTS
Surehead A compact-growing, general crop Cabbage that is well named, as it can be relied upon with certainty to head even under unfavorable circumstances. The heads are large, hard, firm, fine in texture, and sweet flavored. It is a late variety, keeps well, is good for shipping, and is a favorite sort with market gardeners and also for home use. Pkt., 10c.

Danish Ballhead Cabbage
The Best Cabbage for Spring Sales
For several years our strain of this Cabbage has been known to be unexcelled. Danish Ballhead commands a higher price in the market than any other variety. It is remarkable for the solidity of its heads and long-keeping qualities. The heads are of medium size, with a few outer leaves, admitting of close planting; exceedingly fine-grained, hardest of all, tender, crisp, solid, with no waste heart. Pkt., 10c; oz., $1.00

Danish Short Stem
As compared with Ballhead, Danish Short Stem is ready for market ten days earlier. Heads of medium size; lighter in color; outer leaves set very close, producing more weight to the acre. Seed imported direct from Denmark. Pkt., 10c.

LATE WINTER CABBAGE, continued
SELECTED LATE FLAT DUTCH. It grows very large, is remarkably hardy, a sure header, uniform in shape, size, and color. Few varieties can approach this for superior quality. Market gardeners grow this very extensively for a late crop. Pkt., 10c; oz., 60c.

PREMIUM LARGE LATE DRUMHEAD. Head enormous. Very hardy and desirable fall and winter variety, also a good sprouter. Pkt., 10c; oz., 60c.

LUPTON. This fine Cabbage has now acquired a splendid reputation. It is a dark green in color, has a short stem, and is one of the best keepers, coming out in the spring bright and fresh; a little earlier than Flat Dutch and Drumhead. We have some very choice seed. Pkt., 10c.

HOLLAND. The superior merit of this variety is the hard heading and long keeping quality. Heads medium size; white. If properly stored, they will be found, when taken up in spring to be in perfect condition. Pkt., 10c; oz., $1.00.

Autumn King, or World Beater
Large, broad heads are uniform in shape, hard and solid as a rock, fine grained and tender—more so than any other very large cabbage. Forming so few outer leaves, it goes almost all to head. It is a rapid grower, and does not require special culture to bring out its excellencies. Pkt., 10c; oz., 60c.

RED CABBAGE
MAMMOTH RED ROCK. By far the best, largest, and hardest heading red cabbage in cultivation; very uniform in size, weight, solidity, and deep red color. The heads grow to weigh 10 or 12 pounds. Pkt., 10c; oz., 75c.

SAVOY, or CURLLED LEAVED
The quality and flavor of these "cudgel-leaved" Cabbages is very superior; grown in fall and allowed to be touched by frost, they are sweet, delicate, and most delicious.

AMERICAN DRUMHEAD SAVOY. The best of its class for home use and market. Heads large, solid and compact. Has rich, sweet flavor of the cauliflower when cooked. Pkt., 10c; oz., 60c.

HAMMOND'S SLUG SHOT
Kills Insects, Saves Foliage.
Slug Shot kills cabbage worms, also cucumber, melon, squash and potato bugs. Contains nothing in the least injurious.
Celery can be successfully grown with but little labor in a home garden, in any good garden soil, by following the very detailed instructions contained in the little book "CELEY CULTURE," which we mail, postpaid, for 50 cents. Celery is sometimes grown by what is termed the new process, which consists in making a spot as rich as possible and there setting the plants six to eight inches apart each way. If the soil is very rich and there is an abundance of water, the plants will blanch each other and the product will be white and handsome.

One ounce of seed will produce 3,000 plants or more.

Golden Self-Blanching

The best celery in cultivation and the most profitable for market and family use. The handsome appearance and straight, strong stalks of this celery are well brought out in the illustration. The heart is large, solid, golden yellow in color, and of delicious flavor. It will turn at maturity to a yellowish white without banking, but like all other celery is improved by having some soil brought up to the stalks. Pkt., 5c; oz., 85c; ¼ lb., $3.00.

White Plume

The peculiarity of this leading variety is that the inner leaves and heart are naturally white, so that by closing the stalks, either by tying or by drawing the soil close about the plant and pressing it together with the hands, the blanching is completed. It is the earliest celery in cultivation, but will not keep longer than the holiday season. Pkt., 5c; oz., 20c; ¼ lb., 60c.

GIANT PASCAL. Broad, thick, solid, cream-colored stalks of handsome appearance which are entirely stringless, crisp and tender. For January and February use is undoubtedly unsurpassed. It is a good shipping variety, free from rust or rot. Pkt., 5c; oz., 15c; ¼ lb., 50c.

PERFECTION HEARTWELL. One of the best of the white varieties. The stalks are of good size, vigorous growth, very sound and never hollow; crisp, tender, and of exceedingly fine nutty flavor. Pkt., 5c; oz., 15c; ¼ lb., 50c.

EVANS' TRIUMPH. The best late celery. Not only a splendid keeper, but the very large solid stalks are of the finest texture and quality, crisp, brittle, tender, and really nut-like flavor, and has a stronger celery taste than any other variety. Pkt. pkt., 5c; oz., 15c; ¼ lb., 50c.

CELELIAC, or TURNIP-ROOTED CELERY

Produces large turnip-like roots which keep well for winter use; it is highly esteemed either cooked for flavoring soup or sliced and used with vinegar, making an excellent salad. It is cultivated like celery, little or no earthing being required. Ready for use in October. One ounce for 50 feet of row.

BARNARD'S GIANT. Very large roots. Flesh white with a stronger and sweeter flavor than other varieties. Pkt., 10c; oz., 25c; ¼ lb., 85c.

LARGE SMOOTH PRAGUE. One of the best. Roots smooth and almost round. An excellent keeper. Pkt., 5c; oz., 20c; ¼ lb., 50c; lb., $1.75.

CHERVIL. Used for flavoring or garnishing, and is more beautiful than Parsley. Sow in early spring in rich soil, and when plants are large enough, transplant to a foot apart. Pkt., 5c; oz., 10c.

CHICOREE, Fr. "CHICORY. Chicoric, Ger.

LARGE-ROOTED, or COFFEE. The roots, when dried, roasted, and ground, are largely used as an adulterant or substitute for coffee. The young leaves are excellent when used as a salad. Cultivate same as carrots. Pkt., 5c;

WITLOOF. This variety is becoming very popular as a valuable salad plant for winter use. The seed, when planted in the spring, will produce roots for winter forcing. Pkt., 5c;

CHIVES. Their green tops, which appear in early spring, are used wherever the flavor of onions is desired. They are entirely Hardy. One or two clumps are sufficient for a family garden. Clumps, 20c each, prepaid. Not prepaid, each, 15c; dozen, $1.25. Seed, pkt., 5c; oz., 20c.
 Seeds of Sweet or Sugar Corn being liable to rot in cold or wet ground, should not be planted before May, or until the ground has become warm. For a succession, continue planting every two weeks until the middle of July, in rich, well-manured ground, in hills three feet apart each way, covering about half an inch, and thin out to three plants to a hill. The extra early varieties can be planted 18 inches in the row and 2½ feet between the rows.

One quart of seed corn plants 200 to 300 hills; one peck will sow an acre in hills.

CHICAGO MARKET. Quite a popular variety with the market gardeners in the vicinity of Chicago on account of its productiveness, large size, and splendid table qualities. Kernels white, ripening in mid-season. Price: Pkt., 5c; carton, 10c.

BLACK MEXICAN. Well known and a favorite in a great many home gardens, the kernels having a decidedly bluish tinge when ready to eat, later turning to black. It is one of the sweetest varieties in cultivation. Price: Pkt., 5c; carton, 10c.

Stowell's Evergreen The most popular late Sweet Corn. More extensively planted than any other sort, being the general favorite with market gardeners and canners for late use. If planted at the same time with earliest kinds, it will keep the table supplied until October. Ears are of good size, grain deep, tender, and sugary, remaining a long time in condition for cooking. Price: Pkt., 5c; pt., 90c; qt., 50c.

EARLY EVERGREEN. Possessing all the merits of the Stowell’s and maturing about ten days’ earlier. It is a splendid corn for either the gardener or canner. Pkt., 5c; pt., 30c; qt., 50c.

ZIG ZAG EVERGREEN. Pkt., 5c; pt., 30c; qt., 50c.

EXTRA EARLY ADAMS. Pkt., 5c; carton, 10c; pt., 15c.

Other Varieties Carried in Stock

CROSBY’S EARLY. This is extensively grown for canning. Ears short, grain thick and sweet. Comes in three or four days later than Early Minnesota.

EARLY MINNESOTA. An old and popular dwarf variety. One of the best for market and private gardens.

HOWLING MOB. An early large-eared sort.

PERRY’S HYBRID. Nearly as early as Minnesota; larger ears, twelve to fourteen rowed.

OLD COLONY. Ripens a little ahead of Stowell’s Evergreen. Stalks grow tall and carry usually two large ears.

MAMMOTH. Ripens a little later than Evergreen. Large ears; kernels flat; largely used by canners and gardeners.

Prices on pints and quarts do not include postage. Add parcel post rate. Weight: pt., 1 lb.; qt., 2 lbs.
CUCUMBER

Cucumbers succeed best in warm, moist, rich, loamy ground. They should not be planted in the open air until there is a prospect of settled warm weather. Plant in hills about four feet apart each way. The hills should be previously prepared by mixing thoroughly with the soil in each a shovelful of well-rotted manure. Sprinkle the vines liberally with Slug Shot to protect from bugs, and when all danger from insects is past, thin out the plants, leaving three to four of the strongest to each hill.

One ounce of seed will plant about 50 hills; two pounds will plant an acre.

**Davis Perfect** A splendid cucumber for the home gardener and for the truck farmer. Possesses all the merits of the best slicing varieties; wonderfully uniform in shape and exceedingly productive. Their handsome shape and fine dark green color commands the highest price on the market. For that reason it is rapidly becoming a favorite with our market garden customers. Also a good greenhouse Cucumber. Pkt. 5c; oz., 10c.

**EVERGREEN WHITE SPINE.** An extra long, dark green Cucumber, one of the very best for slicing and an excellent variety for shipping. We can recommend this for either the home gardener or trucker. Pkt. 5c; oz., 10c; ½lb., 30c; lb., $1.00.

**IMPROVED LONG GREEN.** This is an old, well-known variety, attaining a length of about 12 inches. A favorite for sweet pickles and also desirable for slicing. Pkt. 5c; oz., 10c.

**Cumberland** A distinct variety of the White Spine type. The fruits are rich, dark green, large, straight and symmetrical. Cumberland is as choice a slicing variety as it is for pickles. The flesh is solid, crisp, tender, and of excellent quality at all stages of growth. Pkt. 5c; oz., 10c; ½lb., 30c; lb., $1.00.

**Chicago Pickling** Originating in Chicago, it is now known the country over as one of the most valuable of the pickling varieties. Of robust growth, it is a reliable and heavy cropper. Fruit is a fine dark green color. In shape, tapering to each end and very uniform. Pkt. 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

**JERSEY PICKLING.** A standard pickling variety, slender and tapering, of good quality and color. Pkt. 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

To pound rate add for parcel postage.

**CRESS, or Peppergrass**

Sow early in the spring, rather thickly, in shallow drills, one foot apart, in the open ground.

**DOUBLE CURLED.** For salads and garnishing. Leaves are pungent. Pkt. 5c; oz., 10c; ¼lb., 20c.

**WATER CRESS.** Scatter the seed on a muddy bank of an ever-running stream. Pkt., 10c; oz., 30c.

**UPLAND CRESS.** Perennial. It is ready to use very early in spring. Has the flavor of Water Cress. Pkt., 5c; oz., 25c.

**DIMAL PERFECT CUCUMBER**

**ARLINGTON WHITE SPINE.** This variety is used for forcing in frames and hothouses. Long fruits of dark green color. Pkt., 5c; oz., 10c; ½lb., 30c; lb., $1.00.

**KLONDIKE.** Averages 6 to 7 inches in length. Color, dark green. The young fruits are good for pickles. Also one of the best for slicing. Pkt., 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

**EARLY CLUSTER.** Vine vigorous, producing the bulk of the crop near the root and in clusters. Fruit short, with uniformly thick end, dark green, but paler at blossom end. Pkt., 5c; oz., 10c; ¼lb., 25c.

**EARLY FRAME, or SHORT GREEN.** A desirable variety either for pickling or slicing. Fruit bright green, straight, round at each end. Pkt., 5c; oz., 10c; ¼lb., 25c.

**EXTRA EARLY GREEN PROLIFIC.** Ten days earlier than the ordinary kind. Small, good for pickles. Pkt., 5c; oz., 10c; ¼lb., 25c.

**NICHOLS’ MEDIUM GREEN.** An old standard variety of good size and superior quality. Pkt., 5c; oz., 10c; ¼lb., 25c.

**WEST INDIA GHERKIN, or BURR.** Small, prickly fruit. This is the variety that is used for small pickles. Pkt., 5c; oz., 10c.

**JAPANESE CLIMBING.** This variety can be trained upon fences and trellises, producing good fruit for slicing or pickling, and is quite a novelty in the garden. Pkt., 5c; oz., 10c; ¼lb., 35c; lb., $1.25.

**FORCING CUCUMBERS**

**TELEGRAPH.** Suitable only for growing in frames or in greenhouses. Smooth green fruit, 14 to 16 inches in length. Pkt., 20c.
EGG PLANT

EIEPFLANZE, Ger.  AUBERGINE, Fr.
Sow in hotbed early in spring; transplant 2½ feet apart each way after weather becomes settled and warm. If no hotbed is at hand, plants may be started in pots or boxes. The potato beetle is very fond of the plants. Paris Green, also Slug Shot, applied same as to potatoes, will keep them in check. One ounce for 1,000 plants. For prices on plants, see page 31.

NEW YORK IMPROVED PURPLE. This variety is a general favorite both for market and private use. Plants large, spreading, foliage light green; fruit very large, oval; color a splendid dark purple. Plants usually ripen four to eight large fruits. Pkt., 5c; oz., 35c.

ENDIVEN, Ger.  ENDIVE, Chicoree, Fr.
For the first crop, sow in May, and for succession, in June and July. When the plants are two or three inches high, transplant them into light soil, one foot apart. When the leaves are eight to ten inches long, tie the tops together to blanch the heart and remove the bitter taste. Lift late in fall with ball of earth attached and place close together in a frame or cellar. It makes a delicious salad for winter use. One ounce will sow 150 feet of drill.

GREEN MOSS CURLLED. A unique variety, somewhat resembling a tuft of moss. Very crisp, tender, and of good flavor. Being less hardy than other sorts, it requires protection from cold. Pkt., 5c; oz., 10c; ½ lb., 30c.

BROAD-LEAVED BATAVIAN. Has slightly wrinkled thick leaves. It is usually grown for use in soups and stews. Pkt., 5c; oz., 15c; ½ lb., 30c.

GARLIC
Used by some for seasoning soups, stews, etc. Plant the sets in spring and cultivate like onion sets. Use sparingly on the table. 150 of roots. Plant in spring.

HORSE RADISH
This is grown from pieces of small end down. Sets by mail, postpaid: dozen, 25c; 100, 50c. In larger quantities, write for prices.

KOHLRABI
Turnip-Rooted Cabbage
KOHLRABI, Ger.  CHOU-BAVE, Fr.
For early use, sow in hotbed, afterwards setting plants 8 inches apart in rows. For later use, sow seed in drills and thin out. One ounce of seed will sow a drill of about 200 feet.

WHITE SHORT LEAVED. Much superior to Vienna. It is very early and the best for forcing as well as for outdoor culture. Bulb is greenish-white, smooth, of finest texture and quality. Pkt., 10c; oz., 25c;

EARLY WHITE VIENNA. Early, small, white bulb. Best for table use. Pkt., 5c; oz., 20c;

EARLY PURPLE VIENNA. A little later than the white; color purple. Pkt., 5c; oz., 20c;

USE ORDER SHEETS
The use of order sheet enclosed in this catalog is a great help to us in facilitating filling and shipping of orders. More will be sent on receipt of a postal asking for same.

Keep a Copy of Your Order. Check goods received with this copy.

LAUCH, Ger.

LEEK, Poireau, Fr.

One ounce of seed to 150 feet of drill.

Sow seed out-of-doors in June and thin out to 4 inches apart. Leek is a vegetable of unusual merit, and is not half appreciated by the American people while it is regarded as a great favorite by many of our foreign population.

LONDON FLAG. This is the sort chiefly grown by market gardeners. It is of excellent quality, mild flavor and uniform. Pkt., 5c;

MUSSELBURG. Large and broad leaves. Flavor mild and pleasant. A good Leek. Pkt., 5c; oz., 15c;

MONSTROUS CARENTAN. The largest variety, often three inches in diameter, and becoming very white and tender. A very hardy and desirable sort, which is worthy of more extensive cultivation. Pkt., 5c; oz., 15c;

To pound rate add for parcel postage.
LATTICH, GER.

LETTUCE

There are two distinct classes of Lettuce. One forms heads like cabbage, the other merely produces loose leaves. The so-called "Head Lettuce" are those most generally cultivated, especially in the home garden. One ounce of seed will produce about 1,500 plants.

Sow the seed in hotbeds in February or March, and for successive crops, sow in the open ground in early spring. When wanted as a cut salad, sow the seed thickly in rows or broadcast.

Curled or Loose Head Varieties

**Black-Seeded Simpson**
The best known and probably the most largely planted of any variety. Early, hardy, dependable, it is a favorite with market gardeners, both for planting outside or for growing under glass. The leaves are large, light green, quite crinkled throughout but especially frilled at the border. They grow compactly without forming a distinct head, are of firm texture and of good quality either for family use or for shipping. Can be planted later than most sorts as its vigorous growth enables it to withstand the summer heat. Pkt., 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

**Grand Rapids**
Of highest merit as a forcing variety. Owing to its peculiar upright habit of growth, it economizes in bench room and in a short time produces a mass of beautifully frilled leaves of splendid quality for the table or for shipping. It is also an attractive and desirable variety for growing outside in the home garden. We have an excellent stock of seed of this variety which is proving very satisfactory to our customers who grow under glass. Pkt., 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

**EARLY CURL ED SIMPSON.** Standard looseleaf variety, forming a dense growth but not heading. The leaves are light green, curled, and of good quality. A satisfactory sort for the home garden. Pkt., 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

**PRIZEHEAD.** Well known, loose-heading lettuce, quite distinct from most other sorts on account of its peculiar color, light green shading to bright reddish brown. The leaves are somewhat crimped and grow more so at the border. In quality, tender and sweet. Pkt., 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

Cabbage or Heading Varieties

**Big Boston**
A splendid Lettuce for market gardeners, either north or south. Leaves are light green, nearly smooth except the outside edges, which are somewhat ruffled. Forms large and very compact heads that are especially suitable for shipping, for which purpose it is planted very largely in the south for the northern market. Pkt., 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

**IMPROVED HANSON.** This is one of the very best for the home garden. Forms solid heads with the inner leaves nicely blanched. The outer ones are light green, handsomely frilled at the edges. In quality it has no superior, the heads being of delicate, crisp texture, tender and sweet. Pkt., 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

**ICEBERG.** Somewhat similar to Hanson, but smaller and of slightly darker color. A good variety for either the market gardener or for family use. Pkt., 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

**All Seasons**
This is a large, solid headed Lettuce, much esteemed by truck growers in the vicinity of Chicago. An excellent variety for the home garden. The leaves are extremely light color, nearly smooth, overlapping each other, nearly blanched the inner ones. Of good substance, sweet and tender. Pkt., 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

**CALIFORNIA CREAM BUTTER.** Favorite head Lettuce for summer planting and extensively grown in the south. Leaves rich, glossy green, slightly tinged with brown, of good quality and flavor. This is a hardy, reliable variety. Pkt., 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

**MAY KING.** This is an extremely hardy Lettuce. Can be planted very early in the spring. Matures more quickly than any other of its class, forming large heads, the inner leaves blanching yellow, the outer ones somewhat tinged with brown. Pkt., 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

**TRIANON WHITE COS.** The varieties of this class are quite distinct from the soft leaf lettuce. The leaves are long and very firm in texture, producing a loaf-shaped head, the inner leaves blanching thoroughly. The quality is excellent, the leaves remaining crisp and fresh. Pkt., 5c; oz., 10c; ¼lb., 30c; lb., $1.00.

We can also supply any of the following well-known varieties at the uniform price of Pkt., 5c; oz., 10c; ¼lb., 30c; lb., $1.00. **Head Lettuce:** Denver Market, St. Louis Market, Wonderful, Black Seeded Tennis Ball, Yellow Seeded Butter, White Seeded Tennis Ball, all excellent forcing sorts. Curled Lettuce: Early Curled Paris, Trianon White Cos Lettuce.

To pound rate add for parcel postage. Smaller quantities, postpaid, at prices named.
Prepare hills 4 to 6 feet apart in a rich, moderately dry sandy soil, thoroughly mixing therewith well-rotted manure. Early in May, or when ground has become warm, plant 10 to 12 seeds one inch deep in each hill, afterwards thinning out so that 3 or 4 plants remain. Pinch the vines when blossoming begins, to promote fruitfulness, and cultivate till the vines cover the ground. To combat insect attacks, dust with ashes, lime, or road dust. Use SLUG SHOT to kill them.

One ounce of seed for 60 hills; 2 to 3 pounds per acre in hills.

GREEN-FLESHED VARIETIES

EXTRA EARLY HACKENSACK. An early strain of the well-known large Hackensack. Very popular with the market gardeners as it is the first of the large melons to be ready for market. The fruit is of good size, round and heavily netted. Flesh green, very sweet and good flavor. Pkt., 5c; oz., 10c; ½ lb., 30c;

CHICAGO MARKET. A large, round melon, much esteemed in the Chicago market. Green flesh, which is thick, fine grained and very sweet. Pkt., 5c; oz., 10c; ½ lb., 30c;

LONG ISLAND BEAUTY. A handsome melon. In form nearly round; somewhat flattened at the ends. Matures early and is hardy and reliable. Pkt., 5c; oz., 15c; ½ lb., 35c;

MONTREAL MARKET. A very large melon, extensively grown in the vicinity of Montreal. Deep green flesh of excellent quality. The fruits are round, flattened at the ends, and have very broad ribs. Pkt., 5c; oz., 15c; ½ lb., 35c;

ORANGE OR SALMON-FLESHED VARIETIES

OSAGE. The best known and most in demand of the red-flesh varieties. Medium size, oval in shape; skin very dark green and slightly netted. The flesh is a rich salmon color, very thick and sweet and of delicious flavor. The market gardeners in the vicinity of Chicago grow this melon extensively, and we have secured a splendid strain of seed to meet their demands. Pkt., 5c. oz., 15c; ½ lb., 35c;

EMERALD GEM MUSKMELON

Emerald Gem Well-known variety of recognized merit. Of medium size, nearly round. Smooth, dark-green skin, salmon-colored flesh, of a lusciousness equalled by few others. One of the best for home use. Pkt., 5c; oz., 15c; ½ lb., 35c;

PAUL ROSE. This melon is a cross between the Osage and Netted Gem, and about ten days earlier than the former. Of a size very suitable for shipping in baskets, it is becoming very popular in the market, especially where its superior qualities are known. The thick, red flesh is exceptionally sweet. Pkt., 5c; oz., 10c; ½ lb., 35c; lb., $1.25.

BURRELL'S GEM. A splendid shipping variety, each melon averaging 2½ pounds in weight. Very tough but thin rind, which is heavily netted. The flesh is an attractive reddish orange and fine-grained, thick and sweet. Has a peculiar flavor. Pkt., 5c; oz., 15c; ½ lb., 35c; lb., $1.25.

HOODOO. A new melon with many good qualities. Its size is about that of the popular Rocky Ford, which appeals to the shipper, while the delicate flavor of the thick, red flesh should commend it to every private grower. Pkt., 5c; oz., 15c; ½ lb., 35c;

TIP TOP. Hardy, vigorous-growing melon of Tip Top quality, commendable to either the truck grower or private gardener. Medium size, yellow flesh, juicy and sweet. Pkt., 5c; oz., 15c; ½ lb., 35c;

MANGO MELON, or VINE PEACH. About the size of an orange, sometimes called "Orange Melon." Fine for sweet pickles or preserves. Pkt., 5c; oz., 25c.

GARDEN LEMON. Similar in size and habit of growth to Mango Melon, but with sharper flavor. Pkt., 5c; oz., 25c.

To pound rate add for parcel postage.
WASSERMELONE, Ger.

WATER MELON  
Melone d'Eau, Fr.

Watermelons delight in a light, sandy soil, fully exposed to the sun. Plant in hills 8 feet apart each way. Put eight or ten seeds in each hill; when danger from insects is past, thin out to three plants.

One ounce of seed will make 20 or 30 hills; 4 pounds are sufficient for an acre.

**Tom Watson**  
Although one of the newer varieties, it is now universally known and planted. No doubt, one of the very best of the large sorts. Attains a weight of about 50 pounds. Oblong in shape, with a thin but tough rind. Dark green, somewhat mottled. The flesh is solid and sweet, of a very handsome scarlet throughout. The many merits of this melon recommend it to both the shipper and the home gardener. Pkt., 5c; oz., 10c; $1/2b, 25c;

**Kleckley Sweets**  
A splendid melon for the home garden. Weighs 20 to 25 pounds. Oblong in shape; very thin but tough rind, dark green mottled. Flesh bright scarlet. Price: Per pkt., 5c; oz., 10c; $1/2b, 20c;

**Cole's Early**  
For the northern states this is desirable on account of its extreme earliness and vigorous growth. Rather small and nearly round in shape. Light green rind, striped with darker green. Scarlet flesh, solid and sweet. Pkt., 5c; oz., 10c; $1/2b, 20c;

**Alabama Sweet**  
Good shipping melon. Oblong in shape; very thin but tough rind, dark green mottled. Flesh bright scarlet. Price: Per pkt., 5c; oz., 10c; $1/2b, 20c;

**Black Diamond**  
Very dark skinned melon of good size and of excellent shipping qualities. Pkt., 5c; oz., 10c; $1/2b, 20c;

**Citron**  
Round; striped and marbled. Seeds red; flesh white. Used for pickles and preserves. Pkt., 5c; oz., 10c; $1/2b, 20c;

**Cuban Queen**  
Oval-shaped. Very productive, averaging about 30 pounds in weight. Rind light and dark green mottled. Flesh scarlet. Pkt., 5c; oz., 10c; $1/2b, 20c;

**Dark Icing**  
Medium size, oval shape melon. A good variety for the home garden as it matures early. Has a thin rind, thick flesh, deep pink and very sweet. Pkt., 5c; oz., 10c; $1/2b, 20c;

**Blanc de Champignon**, Fr.  
MUSHROOM SPAWN  
Champignon Brut, Ger.

Mushrooms are much enjoyed as a table luxury. They may be grown in a variety of situations—a dark room, cellar, stable, in sheds, under greenhouse benches—where the temperature can be maintained at 50 to 65 degrees. Ten pounds of spawn are required for ten feet square.

The mushroom spawn we sell is the product of a noted English maker. We import stock several times each year.

**English Milltrack Spawn**  
Stock of recent importation. It comes in bricks weighing twenty ounces. Each brick is sufficient for eight square feet of bed. Per brick, 20c (by mail, 30c). By express: 5 lbs., 65c; 10 lbs., $1.00; 25 lbs., $2.25. Purchaser pays the transportation charges.

Books about Mushroom Growing

**Mushroom Culture.** An English work. 50c, postpaid.

**Mushrooms.** By Wm. Falconer. The best American book for beginners. Goes into full details. $1.00, postpaid.
MARTYNIA, For Pickles

The young and tender seed-pods make excellent pickles, and as they are produced in great abundance, a few plants will suffice for an ordinary garden. Sow in May or June. Pkt., 10c; oz., 30c; ½ lb., $1.00; lb., $3.00.

MUSTARD, For Salads or Greens

Sow thickly in shallow drills a foot apart, and cut when a few inches high. May also be boiled and eaten like spinach.

One ounce sows 75 feet of drill.

WHITE. Excellent for salads or garnishing. Oz., 5c; ¼ lb., 15c;

BLACK or BROWN. Leaves oblong, broad and cut. Seeds reddish brown. Oz., 5c; ¼ lb., 15c;

SOUTHERN GIANT CURLED. Leaves much crumpled at the edges and twice the size of the ordinary White Mustard. Pkt., 5c; oz., 10c; ½ lb., 20c; lb., 50c.

GIANT SMOOTH LEAF. Large, fleshy leaves of mild flavor. Plant 12 to 18 inches across. A favorite variety in the South. Pkt., 5c; oz., 10c; ½ lb., 20c;

ZWIBEL, Ger. MONTARDO, Fr.

ONION SEED

We pride ourselves in supplying the VERY BEST ONION SEEDS that can be produced.

ANY ARTICLE which is used in quantities proportionately large becomes an article of sharp competition, and this business rivalry naturally leads to strive to produce the commodity at lowest possible price. This, in many things, is legitimate and desirable, but emphatically NOT SO in Onion Seed. Nevertheless, the effort to offer Onion Seed at low prices has a tendency to make the grower less careful in its production, the result being seeds not of the high quality appreciated by experienced planters.

The Onion is most successfully grown in a rich, sandy loam. Continued cultivation upon the same plot of ground, contrary to the general rule, rather improves the crop than otherwise. As early as the ground can be worked in the spring, sow the seed in drills 14 inches apart, covering half an inch. When the plants first appear in the rows, commence hoeing, just skimming the surface. Subsequently, weed thoroughly and carefully by hand. When the tops die, pull the onions and spread evenly over the ground; stir or turn until thoroughly dried, then cut the tops off one-half inch from the bulb. Winter in a frost-proof place.

One ounce for 200 feet of drill; 4 to 5 lbs. for an acre.

GLOBE ONIONS are preferred by some growers to those of any other shape. Such onions do not occupy any more space in the row; their size and solidness make them weigh out and measure more, and their attractive appearance finds for them ready sale in nearly all markets.

SOUTHERN YELLOW GLOBE. Large and fine-shaped globe onion of excellent quality, well known to all onion growers and regarded by them as one of the best. Pkt., 10c; oz., 40c.

YELLOW GLOBE DANVERS. A well-known standard onion for market purposes and home use. A heavy cropper and good keeper. Skin, silvery yellow; flesh white, comparatively mild and well flavored. Pkt., 10c; oz., 40c.

MICHIGAN YELLOW GLOBE. This onion, while globe shaped, has a somewhat flattened base. The bulbs are deep yellow in color, ripen early and are good keepers. Pkt., 10c; oz., 40c.

SOUTHERN WHITE GLOBE. One of the most beautiful globular onions. Of large size, fine quality, and salable anywhere. Market gardeners find it an excellent sort to plant for bunching. Pkt., 10c; oz., 50c.

Barnard’s Select Red Globe Handsome both as to shape and color. A selection of the Southport strain of fine quality for the home garden. A splendid shipper. Growers for the southern market should raise this variety. It is a good yielder and matures early. Color a rich dark red; thin skin. Pkt., 10c; oz., 40c.

SOUTHERN RED GLOBE. Splendid variety, grown very extensively. Of good color and shape. Pkt., 5c; oz., 35c.

NASTURTIUM, or INDIAN CRESS

The seed pods, gathered green, are used in flavoring pickles, or as a substitute for capers.

TALL. Climber, 10 ft. high, ornamental flowers, large seeds. Pkt., 5c; oz., 10c;

DWARF. A trailer, requiring no support; smaller but more profuse. Pkt., 5c; oz., 10c;

OKRA, or GUMBO

ESBARRE SAPHAN, Ger. GUMBO, Fr.

Sow after weather becomes warm, in rows three feet apart, two feet apart in the rows. Will succeed in any good garden soil. The young green pods make a healthful and nutritious soup, and when pickled are a fine salad.

IMPROVED DWARF. A distinct early variety. Pods comparatively short. Pkt., 5c; oz., 10c; ¼ lb., 15c; lb., 50c.

WHITE VELVET. Bears round, white, smooth pods, unlike other varieties, which are ridged or square-edged. The pods are of extra large size, and are produced in great abundance. Pkt., 5c; oz., 10c; ¼ lb., 15c; lb., 50c.

To pound rate add for parcel postage. Smaller quantities, postpaid, at prices named.
ONION — Continued

Prizetaker Very large, mild-flavored onion, sometimes called "Mammoth Spanish." Attains its largest size when started in hotbeds and transplanted. It is quite globular in form with a light yellow skin, and in quality almost equal to the imported onions. A favorite variety to grow for exhibition purposes. Pkt., 5c; oz., 40c.

Ailsa Craig This is a recently introduced onion of the Prizetaker type, which, like that variety, in order to obtain best results, should be started in hotbeds. Grows to an even larger size than the Prizetaker. It is lighter in color, skin almost white. It is very fine grained, with mild flavor. It is now being grown quite extensively and profitably by market gardeners. Should have a place in the home garden. Pkt., 10c; oz., 40c; 1/4 lb., $1.25.

Flat Varieties

RED WETHERSFIELD. Most popular of the red flat varieties. Grows to a large size and is very productive. Being a good keeper, it is grown largely for shipping and also for onion sets. Color, very dark red. Pkt., 5c; oz., 20c; 1/4 lb., 75c;

EXTRA EARLY RED FLAT. This is a smaller and earlier onion than the Red Wethersfield. Of good quality and flavor. Pkt., 5c; oz., 20c; 1/4 lb., 75c; lb., $2.25;

WHITE PORTUGAL. An early, white, flat variety. A favorite with set growers, and a good pickling sort. Also forms a fair-sized onion of good keeping quality. Pkt., 5c; oz., 25c;

YELLOW DUTCH or STRASBURG. This is the kind largely used around Chicago and elsewhere for growing sets. Produces a handsome set of good shape and color and of splendid keeping qualities. Also will mature into a good marketable sized onion. Pkt., 5c; oz., 20c; 1/4 lb., 75c;

YELLOW FLAT DANNERS. This differs from Yellow Globe Danvers in that the bulb is flatter. Being a heavy yielder, it is largely cultivated both for market and home use. It is also grown to a considerable extent for sets. Pkt., 5c; oz., 20c; 1/4 lb., 75c;

AUSTRALIAN BROWN. Of medium size; brownish yellow color. Very hardy and probably the best keeper of all. Pkt., 5c; oz., 20c; 1/4 lb., 65c;

To pound prices add for parcel postage.

Imported Onion Seed

MAMMOTH SILVER KING. In this onion are combined these desirable qualities: immense size, fine shape, white flesh of wonderful tenderness and sweetness. Matures early. For exhibition purposes and for fancy grocery trade this onion is a desirable one to grow. Pkt., 5c; oz., 40c.

WHITE QUEEN. Fine pickling variety. Bulbs flat and small. Sown in February, they will make onions one or two inches in diameter in early summer. Very early and of rapid growth, and keeps the year round. Pkt., 5c; oz., 35c.

Bermuda Onion Seed

Seed Offered Is Genuine Teneriffe Grown

In very early spring, the handsome oval Bermuda onions reach the northern markets, where their great size at once arrests attention. They are tender and mild in flavor. These fine onions can be grown in our northern climate, but will not attain the size of the imported ones. For best results sow in hotbed and transplant. RED BERMUDA. Pkt., 5c; oz., 25c; 1/4 lb., 80c; lb., $3.00.

WHITE BERMUDA. Pkt., 5c; oz., 25c; 1/4 lb., 80c; lb., $3.00.

CRYSTAL WHITE WAX. A white flat onion; fine for slicing. Pkt., 5c; oz., 35c; 1/4 lb., $1.25; lb., $4.00.

ONION GROWERS and Market Gardeners who use large quantities of Onion Seed should write us for special prices. Name quantity and kinds wanted.

To pound prices add for parcel postage.

ONION SETS

Bottom Sets are grown from seed, and are the most used. Top Sets are cultivated in some parts of the country. White Multipliers are fine for bunching green. They are enormously productive. Three quarts of sets will plant a row 100 yards long.

White Bottom Sets Pint, 15c Quart, 25c
Yellow Bottom Sets " 15c " 25c
Red Bottom Sets " 15c " 25c
Top Onion Sets " 15c " 25c
Potato Onion Sets " 25c " 35c
White Multiplier Sets " 25c " 35c

If to be mailed, add 10c per quart.

Prices on large quantities are subject to market changes. Write us when you are ready to buy, stating quantity and kinds wanted.

Seeds by Mail. To our pound prices please be sure to send extra to cover parcel postage.
HAMBURG.

cellars, soups, 1 oz., extra 5c; 10c; 2 Sc.

Soak the seeds a few hours in lukewarm water and sow early in spring, in drills one foot apart. Thin out the plants to four inches. To preserve in winter, transplant to a light cellar or glass frame. Used for garnishing and seasoning soups, meats, etc.

PEANUTS

When sending your seed order, don't forget to order a few Peanuts for the boys and girls. Plant in May, in drills 3 feet apart, placing the nuts 8 to 12 inches apart in the drill. Cultivate flat and keep clean. By mail, postpaid, 1/4 lb., 15c; lb., 25c.

PEPPER, Ger. PEPPER Piment. Fr.

Peppers are indispensable as a seasoning for soups and meats. The large varieties are mainly used for the purpose, and for pickling. The mild, sweet varieties, like Golden Dawn and Ruby King, are used for mangoes, while the small-fruited sorts are best for sauces.

Peppers are more tender than most vegetables. The seed should be sown in a hotbed; cold-frame, or if no other convenience, a box in the window, and transplanted about the last of May. They can be sown in the open ground when the weather becomes warm and settled. Warm, mellow soil, well fertilized, should be used.

One ounce of seed for 1,500 plants.

CHAMBER MOSS CULLED PARSLEY

CHAMPION MOSS CULLED PARSLEY

Champion Moss Culled. The leaves are extra large, extra dark green, tender, crinkled and curled. Just the thing for bunching in pot herbs. We recommend this variety for either greenhouse or outdoor planting. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., $1.00.

FINE DOUBLE CULLED. A curled variety having crinkled leaves. It is used mostly for garnishing. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 85c.

PLAIN OR SINGLE. Plain leaves of excellent flavor. They are longer than those of the curled Parsleys. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 85c.

HAMBURG. The edible portion is the fleshy root. It is highly esteemed for flavoring soups, stews, etc. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., $1.00.

PARSNIP

Parti-NAKE, Ger. PARSNIP, Fr.

1 oz. will sow about 150 ft. of drill.

Cultivate as for Carrots. It is customary to leave Parsnips in the ground over winter, as frost improves the quality of the roots. The Parsnip is valuable not only as a table vegetable, but for stock feeding purposes also.

Magnum Bonum It gives the utmost satisfaction and yields the most money to the market gardener because of its decided handsome appearance, smooth, heavy roots, which are broad at the shoulder, fine grained, and of superior quality. Pkt., 5c; oz., 25c.

HOLLOW CROWN. An old standard sort, long, sweet, and very productive. One of the best for general cultivation. Pkt., 5c; oz., 25c.

IMPROVED GUERNSEY. This is a good, half-long variety, having smooth roots. It is of good quality and recommended for the family garden. Pkt., 5c; oz., 25c.

EARLY ROUND. The earliest. Roots are of small size. Sometimes used for bunching with pot herbs. For shallow soils use this sort. Pkt., 5c; oz., 25c.
E. Rosenberg, Ger.

Our Seed Peas are all grown in the north, and are of the earliest and hardiest as well as the purest strains. They are far superior to most of the Seed Peas sold. They may be expected to bring well-filled pods, which cheap and carelessly grown seed will not do.

The number of Garden Peas is almost limitless. While many of the others continue to be popular, it is worth as much as the standard sorts on the page which follows this.

The smooth-seeded early sorts, such as Leader, Alaska, and First and Best, can be sown while frost is yet in the ground, while larger and sweeter peas sown at the same time would rot. Sow some of the early, second early, and late varieties at intervals of about two weeks apart, and your crop will be supplied with delicious peas during the entire season.

Dwarf and Half Dwarf Smooth Peas

FIRST AND BEST. 2½ ft. A well-known variety; very early and hardy. Planted quite extensively by southern truckers. Pkt., 10c; carton, 15c; pt., 25c; qt., 40c.

BARNARD'S LEADER. 2½ ft. A round, smooth pea, in size similar to the First and Best, but more uniform and more prolific. Matures very early. Pkt., 10c; carton, 15c.; pt., 25c; qt., 40c.

ALASKA. 2½ ft. This is the pea used extensively by canners and truckers for the early market. We have a splendid strain of this variety. Much labor has been expended on it with a view of obtaining earliness, productiveness, and uniformity of growth. Our stock now is such that we can recommend it to the most critical buyer. Pkt., 10c; carton, 15c; pt., 25c; qt., 40c.

TOM THUMB. 12 inches. Peas smooth and white. A very hardy, extremely dwarf variety. Good for early planting. Pkt., 10c; carton, 15c; pt., 25c; qt., 40c.

Postage extra on plints and quarts. Add 1 lb. to plints, 2½c. to quart prices.

Dwarf Wrinkled Varieties

Little Marvel. 18 inches. The ideal pea for the home garden, early and enormously productive. Pods borne in pairs; they are about 2½ inches in length, well filled with large peas of delicious flavor. This variety is taking the place of some of the older and better-known dwarf peas. Price, pkt., 10c; carton, 15c; pt., 25c; qt., 40c.

AMERICAN WONDER. 12 inches. The standard variety of this country for a great many years. Very dwarf; matures early and is vigorous and productive, so well known that it needs but little description here. Pkt., 10c; carton, 15c.

NOTT'S EXCELSIOR. 15 inches. The pods average fully one-third larger than those of American Wonder, and Nutt's Excelsior may not always be equal to it, so early by a few days, are all ready for picking at one time. Each pod contains 5 to 8 large peas. Pkt., 5c; carton, 15c.

SUTTON'S EXCELSIOR. 18 inches. A splendid pea for the home garden. As early as Nott's Excelsior with larger pods that are well filled with large, sweet peas. Pkt., 15c; carton, 15c.

PREMIUM GEM. 18 inches. A well-known and very satisfactory variety for the home garden. A little taller and later than the American Wonder. Pods of good size; peas very sweet. Pkt., 10c; carton, 15c.

RICHARD SEDDON. 18 to 21 inches. A variety of exceptional merit. In season about the same time as American Wonder. The vines and pods of Richard Seddon pea are dark green in color. The latter are well filled with large, sweet peas of finest flavor. It has proven a sure cropper, and is certain to meet with universal favor. Pkt., 10c; carton, 15c.

Laxtonian. 18 inches. The largest-podded of the dwarf wrinkled peas. A splendid new variety, becoming a favorite with those who grow for the market or for the home garden. Might be called a dwarf broccoli. The peas have the same delicate flavor of that variety. Laxtonian matures earlier and is very prolific. If you have not grown this pea, try it this season. Pkt., 10c; carton, 20c.

Dwarf Telephone. 20 in. This grand pea is rapidly gaining favor among gardeners of all classes. In habit it is dwarf and stocky. Bears close planting, and requires no stakes or supports. The pods frequently measure 5 inches in length, and are broad, straight, and remarkably well filled. A splendid mid-season variety. Pkt., 10c; carton, 15c; pt., 30c.
GARDEN PEAS—Continued

Half Dwarf Wrinkled Varieties

EVERBEARING. 24 inches. A large-podded, late variety. Good for summer and autumn use. Pkt., 10c; carton, 15c. pt., 25c; qt., 40c.

ADVANCE. 30 inches. A popular variety with canners. Of vigorous growth and very productive. Pods 2½ to 3 inches long and borne well up on the stalks. Pkt., 10c; carton, 15c; pt., 25c.

ABUNDANCE. 2-2½ ft. Very similar to the Horsford's Market Garden. A good variety for either the canner or the gardener. Pkt., 10c; carton, 15c.

Gradus, or Prosperity 30 inches. A grand, early, large-podded wrinkled pea. Has become one of the favorites with truck growers in nearly every section of the country. Pods are from 4 to 4½ inches in length and the peas are unusually large, very sweet and of delicious flavor. Pkt., 10c; carton, 15c; pt., 25c.

THOMAS LAXTON. 3 ft. Resembles Gradus in many respects. A little earlier and more hardy. Pods not quite as large, but usually more productive. Considered by our truck growers as one of the very best for the early market. Pkt., 10c; carton, 15c.

DELICATESSE. 3 ft. A new English pea, very productive. Pods short, but packed with peas that are extremely sweet and tender. Pkt., 10c; carton, 15c.

IMPROVED STRATAGEM. 2 ft. A splendid late pea. Foliage and pods dark green. Pods about 4 inches in length, well filled with large peas of best quality. Pkt., 10c; carton, 15c.

CARTONS OF PEAS, BEANS, AND SWEET CORN

These special packages are designed for those who find a pkt. too small and a pint more than sufficient. The carton is between the two sizes, and contains a desirable quantity for the family garden. Postage paid.

Tall-Growing Wrinkled Varieties

Pea Vines of tall habit of growth require support of some kind. A wire woven or poultry netting is advisable for this purpose. Sow the seeds in double rows eight inches apart and stretch the wire support between the rows. The ends of the support should be fastened securely to posts at each end. A few additional stakes will afford greater strength.

Alderman 4 ft. A grand second early pea. One of the very best in this class for the market gardener. It is a vigorous growing, productive variety, bearing pods of immense size, 5 to 6 inches in length. Very handsome dark green color. The peas are large, and in quality sweet and tender. Pkt., 10c; carton, 15c.

ADMIRAL DEWEY. 4 ft. Another of the large-podded, medium late peas, quite similar to the Alderman, and like that variety excellent for the market gardener. Pkt., 10c; carton, 15c.

Tall Telephone 4 ft. An old, well-known variety. One of the best of the late maturing sorts. Pods are large, containing 8 to 10 peas of good quality and flavor. Pkt., 10c; carton, 15c.

CHAMPION OF ENGLAND. 4 to 5 ft. A splendid variety and a favorite late pea for the home garden. Pods are large, well filled with peas of good quality. Can be picked for eating in about 70 days after planting. Pkt., 10c; carton, 15c.

GLADSTONE. 4 ft. Main crop. Its long pods are pointed and slightly curved. They are in good condition to pick at a period of the year when practically all other peas have ceased to bear. The peas are of high quality. We bespeak a trial of this fine new variety. Pkt., 5c; carton, 10c; pt., 25c; qt., 35c; pk., $2.00.

SUGAR OR EDIBLE-PODDED PEAS

When cooked, they are equal to the best snap beans. Being hardy, can be planted early in spring. Of strong, upright habit, growing about 12 to 15 inches high. The pods are gathered while young and boiled whole. Packet, 5c; carton, 10c; pt., 25c; qt., 35c; pk., $2.25.

Postage extra on pints and quart boxes. Add 1 lb. to pint, 2 lbs. to quart prices.
**PUMPKIN**

The seeds are planted with corn or potatoes, but may be profitably raised in fields by themselves. Sow early in May in hills eight feet apart. For monster pumpkins for exhibition purposes plant Mammoth Tours in very rich ground and feed liberally with liquid manure.

One ounce will plant 50 hills. 3 seeds to the hill.

**Winter Luxury** A fine cooking sort, 10 to 12 inches in diameter. Golden yellow, netted somewhat like a muskmelon. One of the very best to store through the winter. Pkt., 5c; oz., 10c; $1/4 lb., 25c;

**CALHOUN.** A small, yellowish brown variety with thick, salmon-colored flesh. Fine for cooking. Pkt., 5c; oz., 10c; $1/4 lb., 25c;

**TENNESSEE SWEET POTATO.** This is an old standard pumpkin. Somewhat pear-shaped. Skin and flesh creamy white. An excellent keeper. Pkt., 5c; oz., 10c; $1/4 lb., 25c;

**JAPANESE CUSHAW.** Grown chiefly for exhibition purposes and for stock feed. It grows to an enormous size, frequently weighing over one hundred pounds. Skin salmon color; flesh yellow. Keeps a long time. Pkt., 5c; oz., 10c; $1/4 lb., 30c;

**MAMMOTH TOURS.** Grown chiefly for exhibition purposes and for stock feed. It grows to an enormous size, frequently weighing over one hundred pounds. Skin salmon color; flesh yellow. Keeps a long time. Pkt., 5c; oz., 10c; $1/4 lb., 25c;

**CUSHAW, GREEN STRIPED.** Large crookneck pumpkin. Cream-colored, striped with green. Very popular in the South. Pkt., 5c; oz., 10c; $1/4 lb., 25c; lb., 80c.

**LARGE CHEESE.** A large buff-colored variety of distinct shape, used extensively for canning. Pkt., 5c; oz., 10c; $1/4 lb.,

**RADISH**

For an early supply, sow in a hotbed in February, care being taken to give abundant ventilation to prevent running to leaves. For open air culture and succession, sow from middle of March until September at intervals of a week or ten days. The growth must be rapid to insure crispness, succulence, and mildness of flavor. A fine, dry, sandy loam, enriched and made light with well-rotted manure is best adapted for the purpose, all heavy soils producing directly the opposite results from those desired.

One ounce to 100 feet of drill; 9 or 10 lbs. per acre.

**GLOBE AND TURNIP-SHAPED VARIETIES**

Except otherwise noted, any variety; Pkt., 5c; oz., 15c; $1/4 lb., 40c; lb., $1.50

**Early Scarlet Globe** Special Market Gardener's Strain. This is a splendid variety for hotbed or greenhouse culture. We consider it the best of the round scarlet forcing sorts. Our sales of this stock are to some of the largest growers under glass in the country. The radishes mature very quickly, producing small growth of tops and are solid and crisp; very uniform in shape. The color is a handsome, bright scarlet. When bunched, these radishes bring the top price. Sample packet free to those who grow for the market. Pkt., 5c; oz., 15c; $1/4 lb., 50c.

**NON PLUS ULTRA.** Well-known variety. Good for forcing; matures in 18 to 20 days. Color, bright scarlet.

**EARLY SCARLET TURNIP WHITE TIP FORCING.** This is a special forcing strain of the well-known Scarlet Turnip White Tip Radish.

**SCARLET TURNIP WHITE TIP.** Market gardeners' favorite Radish for outdoor planting. A very desirable one for the home garden. It is an early maturing variety, only a little later than the forcing strain. Turnip-shaped; handsome scarlet in color, with a distinct white tip. We have two strains of this variety, one where the white is just in evidence and another in which the white covers about one-third of the radish. The latter strain is the favorite one. Rosy Gem. Very similar to the above variety. Round; scarlet with white tip.

**Crimson Giant** A large globe-shaped variety. Hand some deep scarlet; thin skin, solid white flesh of best quality. Attains a large size without becoming pithy or losing its crispness. An excellent variety.
EARLY WHITE TURNIP. Very much like the scarlet; a little earlier in maturing. Skin and flesh pure white.

LARGE WHITE SUMMER. This is a radish which is quite popular in certain sections of the south. Nearly round in shape. Pure white. Attains a size of 3 inches in diameter without losing any of its good qualities.

YELLOW SUMMER. Turnip-rooted. Can be sown late; stands heat well. Skin light yellow, flesh white.

**Olive-Shaped Varieties**

**CARMINE OLIVE.** An extra early olive-shaped radish. Color, deep carmine skin; flesh white, solid, and crisp.

**ROSE OLIVE.** A quick-growing, bright scarlet radish of good quality, from 1½ to 2 inches in length.

**French Breakfast**

An oblong-shaped radish. Fine for open ground or forcing. Valued for its excellent quality and fine color, which is a splendid scarlet on the body and white at the extremity. Flesh white, tender, and mild.

To pound rate add for parcel postage.

**HALF LONG AND LONG VARIETIES**

Price of all named below (except as noted): Pkt., 5c; oz., 15c; 1/4 lb., 40c; lb., $1.50.

**LONG SCARLET SHORT TOP.** A well-known variety and extensively planted. Roots 6 inches in length, about one-third of which grows above the ground. Color, bright red.

**Cincinnati Market** Similar to the above, grows a little longer and is more slender; somewhat darker in color. A splendid radish for the table or for the market.

**HALF LONG DEEP SCARLET.** An early radish much esteemed by some growers. Roots about 3 inches in length; attractive deep scarlet. Flesh white and firm.

**BRIGHTEST LONG SCARLET, or CARDINAL.** Vivid scarlet, tipped with white. For so long a radish is very early, being ready for use in 23 days.

**CHARTIER.** One of the very best for outdoor sowing in summer. Roots bright crimson in upper portion, shading to white at the tip. Can be eaten when quite small. Remains solid and crisp.

**ICICLE.** A beautiful pure white radish, about 5 inches in length and quite slender. This is one of the very best of the summer radishes. Skin is smooth and thin; flesh fine-grained.

Special Prices on 5 lbs. or more if ordered at same time.

**WINTER VARIETIES**

**Sow in July and August**

**WHITE STRASSBURG.** A good, late radish, oblong shape. Both skin and flesh are pure white. Roots when fully grown, about 6 inches in length and 2 inches in diameter.

**WHITE STUTTGART.** Another good summer radish, somewhat turnip-shaped. Grows quickly and attains a good size. Skin and flesh pure white and quality excellent.

**CHINESE WHITE.** A large, white smooth skin radish, cylindrical in shape, 6 to 8 inches long and 2 or 3 inches in diameter. Mildest flavored of the winter sorts.

**CHINESE ROSE.** Not quite as large as the white variety and more pungent. Skin bright rose, flesh white. A splendid keeper, and grown largely for the market.

**LONG BLACK SPANISH.** A long, very hardy radish. Skin nearly black; flesh pure white. Very well known and extensively planted.

**ROUND BLACK SPANISH.** A large, turnip-shaped radish. Skin and flesh same as the long variety. Quality about the same.

**SAKURAJIMA.** A mammoth Japanese variety. Flesh pure white, with sharp but agreeable flavor. Pkt., 5c; oz., 20c.
RHUBARB
Or Pie Plant
Sow seeds thinly in shallow drills one foot apart. Thin the seedlings to stand 3 or 4 inches apart. Keep the soil loose and free from weeds. In fall or spring select the strongest seedlings and set out permanently three feet apart each way.

LINN/EUS. The earliest variety grown. Desirable for market or family gardener. Pkt., 5c; oz., 15c; ½lb., 30c; lb., $1.00.

VICTORIA. Leaf stalks tall and large. Sometimes weighing 2 lbs. each. Skin thick and red stained. Pulp quite acid. Productive and profitable for market gardeners. Pkt., 5c; oz., 15c; ½lb., 30c; lb., $1.00.

RHUBARB ROOTS
When only a few plants are required, we would suggest the purchase of roots instead of seed. From our medium size or large clumps, Rhubarb stalks can be cut the following season. The growth of the plant is so rapid from these clumps. A mulch of stable manure during the winter will insure their protection and stimulate stronger growth in the spring. Mailing size, each 15c; post-paid; clumps. See page 28.

SORREL
Sow thinly in shallow drills about one foot apart. Remove seed stalks as soon as formed.

LARGE LEAVED FRENCH. Used for soups and salads. Its green leaves have a pleasant acid flavor. Pkt., 5c; oz., 15c;

SPINACH
Spinat, Ger.

GIANI THICK LEAVED. An early variety; very hardy and of good quality. Large, round leaves, nearly smooth, of dark green color; favorite with market gardeners. Pkt., 5c; oz., 15c; ½lb., 40c.

VICTORIA. Large, very dark green leaves, slightly crimped. Remains in good condition for market for a long time. A newer variety that is becoming very popular with the truckers. Planted extensively in the South. Pkt., 5c; oz., 15c; ½lb., 40c.

BROAD FLANDERS. One of the most vigorous and strong growing varieties. The leaves are nearly round, uniformly deep green, thick and somewhat crimped in the center. Pkt., 5c; oz., 15c; ½lb., 40c.

LONG STANDING. Leaves dark green and thick. Not inclined to run to seed for a long time. Popular with market gardeners. Pkt., 5c; oz., 15c; ½lb., 40c.

PRICKLY WINTER. Use for fall sowing, as it is extremely hardy. Seeds prickly, leaves not so large as those of other varieties. Pkt., 5c; oz., 15c; ½lb., 40c.

BLOOMSDALE or Savoy Leaved. Of upright growth; leaves curled and crimped, thick and fleshy. Keeps well after cutting. Suitable for fall sowing. Pkt., 5c; oz., 15c; ½lb., 40c.

NEW ZEALAND. A different type of Spinach, suitable for use during the hot weather. Plants grow to a large size, producing an abundance of leaves, tender and of good quality. Pkt., 5c; oz., 15c.

To pound rate add for parcel postage.

SALSIFY
Or Vegetable Oyster
Soil and culture should be the same as for parsnips, taking pains to make sowings as early as practicable each spring. Salsify is boiled like parsnips or carrots, or is half-boiled and grated, then made into balls which are dipped into batter and fried like oysters.

MAMMOTH SANDWICH ISLAND. A new and improved type, producing roots of nearly double the size and weight of the old sort, and in every way preferable. Much valued by market gardeners, as it grows stronger and is less inclined to branch. Pkt., 5c; oz., 15c; ½lb., 50c; lb., $1.75.

BLACK SALSIFY or Scorzonera. Similar to above, but skin is black. Pkt., 5c; oz., 25c; ½lb., 75c; lb., $2.00.

SWISS CHARD
Or Spinach Beet
Also called Sea Kale Beet. The middle of the leaf, or midrib, is cooked and served like asparagus. The other portions of the leaf may be used like spinach. This beet does not make a large root, but is a delicious summer vegetable when cut young and used for "greens." There are several varieties of Swiss Chard. We recommend the Lucullus where the rib of the leaf is to be used. When wanted as a substitute for spinach, the Yellow cutting variety. We supply either sort at: Pkt., 5c; oz., 15c; ½lb., 40c.
SQUASH
Cowpea, Fr.

Plant when all danger from frost is past, and get in the winter varieties as soon as possible in order that they may mature. Plant in hills 4 feet apart for the bush varieties and 6 or 8 feet apart for running sorts. Put 6 or 8 seeds in a hill, thinning when all danger from insects is past to 3 or 4 plants in a hill. If the young plants are dusted two or three times with Bug Death before the bugs come, the insects will not be likely to attack them.

One ounce for 50 hills; 3 to 4 lbs. per acre.

MAMMOTH WHITE BUSH SQUASH

Early Summer Varieties

MAMMOTH WHITE BUSH. An early, round, flat squash; color clear white, handsomely scalloped. Called Patty Pan in the South. Largely planted in every section of the country. One of the very best of the early summer varieties. Pkt., 5c; oz., 10c;

MAMMOTH YELLOW BUSH. Same as above, except in color, which is a bright yellow. Early and of good quality. Pkt., 5c; oz., 10c;

MAMMOTH SUMMER CROOKNECK. A well-known and standard variety. Grows from 18 inches to two feet in length. The shell is hard and warted and of an attractive bright yellow color. The thick flesh is of good quality. Pkt., 5c; oz., 10c;

Fall and Winter Varieties

ORANGE MARROW. Handsome appearance; creamy colored. Pkt., 5c; oz., 10c;

FORDHOOK. This squash can be either used as a summer or winter variety. Color bright yellow, meat thick and good quality. Pkt., 5c; oz., 10c;

DELICIOUS. This is a new variety for which there is an increasing demand. It is top-shaped, of medium size. Hard, green shell. The flesh is deep yellow; rich, fine-grained, and splendid for cooking. Pkt., 5c; oz., 10c;

DELICATA. A small, oblong-shaped winter variety. Orange-colored striped with dark green. Firm, sweet flesh. Pkt., 5c; oz., 10c; ½lb., 30c;

HUBBARD. A favorite winter squash. Shell dark green and extremely hard. Flesh rich orange; dry and sweet. Splendid for cooking or pies. Pkt., 5c; oz., 10c;

WARTED HUBBARD. Same as above, except that the shell is rough or warted. This variety is an excellent keeper. Largely grown for the market. Pkt., 5c; oz., 10c;

BOSTON MARROW. Early fall sort; rich orange color, excellent flavor. Pkt., 5c; oz., 10c;

MAMMOTH CHILI. Favorite variety for exhibition purposes. Attains an immense size, weighing sometimes 200 lbs. or more. Excellent for stock. Can also be used for the table, as the flesh is fine-grained and of good flavor. Pkt., 5c; oz., 15c; ¼lb., 40c; lb., $1.40.

Sibley or Pike's Peak. An old, well-known variety. Oval shape; hard, dark green rind. Flesh rich golden yellow, of fine cooking quality. Pkt., 5c; oz., 10c;

GOLDEN HUBBARD. Earlier than Green Hubbard; a little smaller. Color orange red. Pkt., 5c; oz., 10c;

ESSEX HYBRID. Sometimes called Turk's Cap. A good-sized squash with a hard shell. Popular in some sections of the country. Pkt., 5c; oz., 10c;

VEGETABLE MARROW. A small mottled green and yellow squash. Flesh white and very tender. This is the famous English variety and highly prized by English people. Price, pkt., 5c; oz., 10c;

To pound rate add for parcel postage. Smaller quantities, postpaid, at prices named.
For early crops sow in hotbed, greenhouse, or inside the window or sitting room, where the temperature does not fall below 65 degrees, in February or March, transplanting—to secure stockiness—when three inches high, in pots, cold-frames, or other parts of the bed, and about five inches apart. After all danger of frost is over, transplant finally to open ground.

ACME, Improved Strain. Ripens early; of medium uniform size; glossy red with purplish tinge; round and smooth; free from cracks. An excellent tomato for market gardeners’ use, as it ships well. Pkt., 5c; oz., 25c.

BEAUTY, Improved Strain. This has been a standard variety for many years, and is still the favorite main crop tomato with all market gardeners. Medium early, round, very uniform shape. Skin smooth, crimson with purplish tinge. Flesh solid and of excellent flavor. A splendid tomato for either home garden or for shipping. Pkt., 5c; oz., 25c.

CORELESS. A grand main crop, scarlet, globe-shaped variety. One of the best for shipping long distances. Bears its fruit in clusters, immensely productive. Pkt., 5c;

CRIMSON CUSHION. Bears continuously and late. Extremetallarge and smooth; solid as a beefsteak; nearly seedless.

Dwarf Champion (Tree Tomato). Quite divine from the other varieties in habit of growth and foliage. Good sort for the home garden as the plants, owing to the peculiar upright growth, take up but little room and yield abundantly. Reminiscent of Acme in form and color. Pkt., 5c; oz., 25c.

DWARF STONE. A vigorous growing, dwarf, red tomato of recent introduction. Fruit good size, and of excellent quality. This variety is becoming very popular. Pkt., 5c; oz., 25c;

JUNE PINK. The earliest of the pink tomatoes and one of the very best for the family garden. The skin is thin, very smooth; flesh solid, of excellent quality and flavor. An especially good tomato for slicing. Pkt., 5c; oz., 25c;

EARLIANA. A fine scarlet tomato. Ready for the market several days ahead of any other variety. Ripens uniformly and is a good yielder. We have a special market garden strain of this seed. Pkt., 5c; oz., 30c.

CHALK’S EARLY JEWEL. An early tomato, vigorous and productive. Fruit deep scarlet, of good size and fine quality. A good variety for either home use or for the market. Pkt., 5c;

LIVINGSTON’S GLOBE. A good globe-shaped tomato. Skin smooth, of purplish tinge. Flesh is firm, of good quality. Can be used for greenhouse culture. Pkt., 5c; oz., 25c;

EARLY DETROIT. The latest new tomato. The vine is a better yielder and more vigorous than that of Acme. Not only are more fruits produced, but they average more nearly globe-shaped, are heavier, and are equally as firm, smooth, and suitable for shipping. The fruits are of good size throughout the season, which is unusually long for so early a variety. We are confident that this rare combination of very desirable features will soon bring Early Detroit into general prominence as the best of its class. Pkt., 5c; oz., 25c;

PERFECTION. A well-known, large, smooth, red tomato. Pkt., 5c;

PONDEROSA. This is a very large, solid tomato. Color pink, changing to purple. On account of its large size it is suitable to grow for exhibition purposes. It is of good quality, however, and very largely in demand for home gardens. Pkt., 5c; oz., 35c.

STONE. A large, bright-red tomato, very well known and highly regarded. One of the very best for canning purposes. Good also for slicing. Matures early and very uniformly. Vigorous and productive. Pkt., 5c; oz., 25c;

COMET (Forcing). Considered the best of the greenhouse varieties. Fruit scarlet and medium size. Pkt., 10c; oz., 50c.

SMALL-FRUIT ED TOMATOES

STRAWBERRY, or Husk Tomato. Also called ground cherry. The small yellow fruits are each enclosed in a husk, and are of delicious flavor, either raw or preserved. Pkt., 5c;

YELLOW PLUM, Red Currant, and Red Cherry. Pkt., 5c;

PEAR. Quite distinct from other varieties. The skin has the color and texture of a peach. It grows about the same size. Pkt., 5c;
For early use, sow as soon as ground opens in spring, in drills from 12 to 15 inches apart; thin out to 6 or 9 inches in the rows. For succession, continue to sow every two weeks until June; for fall and winter crop, sow in July and August. The Rutabagas are grown for feeding stock, and are also excellent for the table. Take up the roots in November, or before severe frosts; cut off tops within an inch of the crown, store in cool cellar or pit, or pile in a conical form out-of-doors, in dry ground; cover carefully with long straw, and finish by earthing up with about 12 to 15 inches of earth, leaving a trench around the heap to carry off water. One ounce of seed for 150 feet of drill; one pound for an acre.

**Extra Early Purple Top Milan**

Of handsome appearance; somewhat flattered, white with purple top. Two weeks earlier than Purple Top Strap Leaf, good for spring or fall planting. Bulbs form very rapidly. Pkt., 5c; oz., 15c.

**EARLY WHITE MILAN.** Similar in shape and size to the above, equally early; surface smooth and pure white; flesh white, tender, fine grained, and of fine table quality. Pkt., 5c; oz., 15c.

**EARLY WHITE FLAT DUTCH.** A popular, early, white, flat turnip of medium size. Smooth and of good quality. Pkt., 5c; oz., 15c.

**WHITE EGG.** A good, early, oval-shaped turnip. Grows partly out of the ground. White and smooth skin; flesh mild and sweet. Pkt., 5c; oz., 15c.

**Purple Top White Globe**

A fine table turnip. It is an early and heavy cropper as well as a good keeper. The bulb is a very handsome globe, and is especially in demand among market gardeners. This is also a good turnip for stock feed as it will grow to a large size if left for that purpose. Pkt., 5c; 1/2 lb., 40c.

**Purple Top Strap Leaf**

This is probably more extensively planted than any other variety. It is a very early flat turnip of medium size, the lower portion white and the upper part reddish purple. The flesh is fine-grained and sweet. A splendid table variety and desirable also for stock feed. Pkt., 5c; oz., 15c; 1/2 lb., 40c; lb., $1.50.

**WHITE FLAT NORFOLK.** A large white round turnip, chiefly planted for feeding stock. Pkt., 5c; oz., 15c.

**COW HORN.** A long, white, carrot-shaped turnip, growing to a length of 12 to 14 inches. Flesh white and solid. Suitable for table use when small, and when matured excellent for feeding stock. This variety is sometimes planted to plow under as a fertilizer. Pkt., 5c; oz., 15c.

**POMERANIAN WHITE GLOBE.** A large and most perfect globe in shape, skin white and smooth. Of strong growth and one of the most productive varieties. Valuable for both table and stock. Pkt., 5c; oz., 15c.

**SNOWBALL, OR SIX WEEKS.** The finest white-fleshed, ball-shaped, early table turnip. Bulbs small, smooth, and round, with clear white skin and sweet, crisp flesh. Pkt., 5c; oz., 15c; 1/4 lb., 40c.

**YELLOW GLOBE.** A handsome light yellow turnip. Fine grained, sweet and tender. Pkt., 5c; oz., 15c.

To pound rate add for parcel postage.

**PURPLE TOP YELLOW ABERDEEN.** Root round and tapering. Flesh pale yellow, tender, sugary, and of superior flavor. A hardy and productive standard variety. Pkt., 5c; oz., 15c.

**RUTABAGAS**

Rutabagas Swedish or Russian Turnips are extensively grown for a farm crop. The roots are close-grained, hard, and will endure a considerable degree of cold without injury if preserved in a pit or cellar during the winter. Rutabagas are superior to any other vegetable root grown for cattle, horses and sheep. The animals thrive and fatten on rutabagas, carrots, and manges fed in combination with hay.

**American Purple Top.** A very large, globe-shaped turnip. Rutabaga, yellow with purple top. Hardy, vigorous growing variety of excellent quality for the table and one of the best for stock feed. Pkt., 5c; oz., 15c; 1/4 lb., 50c; lb., $1.75.

**SKIRVING'S PURPLE TOP.** An old, well-known variety, grows to a large size; very productive and good keeper. Pkt., 5c; oz., 15c; 1/4 lb., 50c; lb., $1.75.

**WHITE SWEDE OR RUSSIAN.** A large, white, globe-shaped Rutabaga. Flesh fine quality, sweet and tender. Excellent for the table. Can be grown to a large size if wanted for stock feed. Pkt., 5c; oz., 15c.

**TOBACCO SEED**

(One ounce will sow a bed of fifty square yards)

The seed should be sown as early as possible after danger of frost is over. When the plants are about six inches high, transplant into rows four or five feet apart each way.

**CONNECTICUT SEEDLEAF.** This variety is grown in the Middle and Northern States, being comparatively hardy. Pkt., 5c; oz., 20c; 1/4 lb., 60c.

**Havana.** The seed offered is a superior strain of Cuban grown stock. Pkt., 10c; oz., 40c; 1/4 lb., $1.00.
Medicinal and Pot Herbs

The cultivation of herbs is very simple, and but little care is needed beyond keeping down the weeds. Sow in April or May, in drills 12 to 15 inches apart, and thin out the young plants where they stand too thickly. Gather when just coming into bloom, tie in small bunches and dry in the shade.

Vegetable Plants

Prices named do not include prepayment. If wanted by mail, add for postage 5c per dozen, 25c per 100 on Cabbage, Cauliflower, Celery, and Sweet Potato Plants; 10c per dozen on Egg Plants, Pepper, and Tomato Plants. We strongly advise shipment be made by express.

Fifty or more at 100 rate.

CHIVES. Per clump, 15c. 1.25

Culinary Roots

ASPARAGUS

A year's time can be gained by setting out Asparagus roots instead of planting seed. A bed of Asparagus, properly made, should last for twenty years or more. The ground should be spaded to a depth of at least two feet and well fertilized. For a small garden, it is desirable to set out the roots in rows two feet apart and 10 to 12 inches between the plants in the row. The roots should be carefully spread out and the crown covered to a depth of about four inches.

Our two-year-old Asparagus roots are heavy, clean stock that will make a vigorous growth the first season.

Note—Prices do not include postage. If to be mailed, add 25c per 100 for the one-year-old plants, and 50c per 100 for the two-year-old plants.

Bonvallet's Giant. One-year-old, 100, 75c; 1,000, $5.00. Two-year-old roots, 25 for 40c; 100, $1.00; 1,000, $7.00.

Columbian Mammoth White. One-year-old, 100, 60c; 1,000, $4.50. Two-year-old, 25 for 40c; 100, $1.00; 1,000, $7.00.

Conover's Colossal. One-year-old, 100, 50c; 1,000, $4.00.

Two-year-old roots, 25 for 30c; 100, 75c; 1,000, $2.50.

Palmetto. One-year-old roots, 100, 50c; 1,000, $4.00. Two-year-old roots, 25 for 30c; 100, 75c; 1,000, $2.50.

HORSE RADISH SETS. Dozen, 25c; 100, 75c, postpaid.

Special Prices on Large Quantities

RHUBARB ROOTS. Mailing size, each, 15c, postpaid. Clumps, each, 25c to 75c, according to size; not prepaid.

Bedding Plants

In May, we carry large stocks of seedling Asters, Pansies, and Salviæ; also Geraniums and other pot-grown plants.
I N THIS DEPARTMENT we catalogue only those varieties and strains which from our long experience we know to be of sterling worth. We do not handle seeds of poor or unknown quality, but aim to give our customers seeds that are pure, fresh, and reliable.

About Sowing and Transplanting

M OST flower seeds germinate well in a rather light, sandy loam, exposed to the sun, while a few are benefited by partial shade, and some do best with an element of clay finely mixed with the soil. Nearly all the hardy seeds vegetate better when planted in early spring as soon as the soil can be worked fairly easily.

A general rule for the seed-bed is to have the soil rich, level, and worked very finely. Sow the seed evenly in the rows, cover with the finest of soil, about three times the diameter of the seed, and press the soil firmly over the seed. The soil should never become dry after the seeds have swelled, for if it does, they will be pretty sure to fail. For this reason it is best to sow most small seeds in shallow boxes 2 to 3 inches in depth and of any convenient size, that the surface of the soil may be kept properly moistened.

After the seeds are up, care must be taken to give them plenty of air and moisture, and yet not too much water, or they will "damp-off" (rot at the top of the ground). As soon as the second leaves are well out they should be transplanted into pots or new boxes. When finally transplanted to the bed or border they should be watered frequently until well established.

Flowering Plants Are Classified under Three General Headings as Follows:

**ANNUALS** grow, bloom and die the first year from seed.

**BIENNIALS** bloom the second year from seed and then die, though many, if sown early in the spring, will flower the first year.

**PERENNIALS** usually bloom the second year from seed, and continue to grow and bloom for many years. Some will bloom the first year if sown early.

**AGERATUM (Floss Flower)**

One of the best hardy annuals for bedding outdoors in summer and for pot culture in the window during winter. The blue feathery flowers are much used for vases and to make bogquets. Ageratum comes easily and readily from seed, even when sown out of doors. It is a flower that does not become discolored by heavy rain or hot sun........ 5 cts.

**ALYSSUM—SWEET**

A hardy annual which begins to bloom very early and continues all through the summer clothed with clusters of pure white fragrant flowers. Of spreading habit and dwarf growth, just the thing for edgings.................. 5 cts.

**ANTIRRINUM (Snapdragon)**

Ornamental foliage and flowering annuals of rapid growth, easy culture and very showy. They grow 4 or 5 feet high. Some of them have drooping flowers. These plants are best suited for backs of borders or centers of beds. They require abundance of room to spread themselves........ 5 cts.

**AMARANTHUS**

Ornamental foliage and flowering annuals of rapid growth, easy culture and very showy. They grow 4 or 5 feet high. Some of them have drooping flowers. These plants are best suited for backs of borders or centers of beds. They require abundance of room to spread themselves........ 5 cts.
**Asters**

Asters are annuals, originally from China. There were only three colors at first and the flowers of each were single. Now there are scores of varieties in different shades and colors. When all other flowers of the summer have passed away Asters are yet in bloom. They are so hardy they will endure some frost without injury. Then, too, they are very easy to grow. By sowing seed at intervals flowers may be had from July until late September.

**Balsam—Lady’s Slipper**

A favorite, quick growing annual of easiest culture, growing to perfection in any rich soil. The plants like a sunny position and plenty of water. Sow the seed in beds, transplanting the seedlings to make them grow strong and bushy. The flowers, in several colors, are very large and extra double.

**Bachelor’s Button**

These beautiful annuals are much admired. They are plants that everybody can grow, blooming with great freedom all summer. The plants grow about two feet high. We offer a mixture of the prettiest colors.

**Balloon Vine**

A rapid growing climber, which succeeds best in warm soil. Flowers white; seed vessels look like small balloons. Annual.

**Candytuft**

A beautiful hardy annual of the easiest culture; generally found in every garden. The seed can be sown in fall for early flowering. That sown in spring quickly makes thrifty plants, which yield large quantities of flowers for cutting. Candytuft likes rich soil and plenty of room to spread out and bloom freely.

**Canterbury Bells**

They are biennials of handsome appearance; some grow two feet high. They produce large, bell-shaped flowers in many shades of blue, purple, white and spotted. Prefers moist, rich soil.

**Carnation Margaret**

These carnations are much esteemed, not only for their beautiful colors, but that, unlike all others, they bloom in about four months from sowing the seed and continue until frost. Plants are neat, branching and compact. Almost all the flowers are double.

**Chrysanthemum Seeds**

Summer-blooming garden annuals, of compact, thrifty growth, 1 to 1 1/2 feet high, producing quantities of large single flowers, 2 inches across. Colors, crimson, gold, maroon, white, etc.; very effective for flower beds, pot culture and for cut flowers. Plants grow quickly and flower freely.
COBAEA SCANDENS
A fine rapid growing annual climber with handsome foliage and bell-shaped purple flowers. Trained upon a trellis facing south this vine will run about twenty feet or more during the season. Seeds should be placed edge downward when planted .......................... 5

COCKSCOMB
Highly ornamental plants producing crested heads of flowers resembling a cock's comb. The flowers are of many colors and shades, but the scarlet and crimson are the most brilliant and rich. Showy plants may be raised from seed planted in open ground in May. The oftener they are transplanted or shifted the larger and more beautiful they grow. Should be planted about 3 feet apart............ 5

CALIOPSIS, CALIOPSIS or COREOPSIS
One of the most showy hardy annuals; will thrive anywhere. Especially good for city gardens. The graceful flowers embrace nearly every shade of yellow, orange and rich brown, verging to crimson. They are borne on long slender stems, particularly well adapted for bouquets..... 5

CONVOLVULUS (See Morning Glory.)
CYPRESS VINE
For training upon a trellis, or upon strings fastened to bird houses, this fine climber is unexcelled. Its scarlet and white flowers and delicate, dark green, feathery foliage completely cover each plant. Soak the seeds over night in warm water before sowing. Sew where the plants are to bloom, as they do not transplant well.................... 5

Cosmos Tall growing plants which are at their best in late fall. Very hardy, rapid grower. Dahlia-like single flowers in various colors. Start the seed early in the house and transplant......................... 5

ESCHSCHOLTZIA
The State Flower of California
Useful for beds or massing. They begin to bloom in a few weeks from spring sown seeds and continue to flower until late in the fall. The large, saucer-shaped flowers are of a beautiful yellow, orange or white, the foliage is finely cut, giving the plants an exceedingly showy appearance.. 5

FORGET-ME-NOT or Myosotis
An old favorite. It flourishes best in a moist shady situation and is in constant bloom nearly the whole season. Fall sown seed will flower in early spring. If sown in boxes in the house, early, will flower the first season. Six to twelve inches.. 5
FEVERFEW (Matricaria)
Extremely beautiful plants, with handsome light green, laciniate foliage. Grows freely in any garden soil and bears numerous, perfectly double, pure white flowers, one inch in diameter. Hardy annuals

FOUR O’CLOCK
(MARVEL OF PERU)
Robust growing, free flowering annual; requires plenty of room. The pretty red, white and yellow flowers open in the afternoon and make a beautiful display

GAILLARDIA
(BLANKET FLOWER)
Showy annuals succeeding best in good soil, growing about two feet high. The flowers are large and handsome in several shades of yellow, orange and crimson. Excellent for cut flowers

Gomphrena
A first rate bedding plant.
Its flowers can be dried and used in winter bouquets

Ornamental Gourds.
Handsome climbers of rapid growth. Very useful for covering fences and other unsightly places, producing fruit of peculiar and various forms which, if allowed to ripen on the vines, can be kept for months as curiosities

HOLLYHOCK
For any place in the garden where tall, showy plants are needed Hollyhocks are pre-eminent. The flower spikes, five to six feet high, are crowded with large handsome flowers ranging from white to maroon. Our strain of seed is much superior to that ordinarily sold. If sown early the seed sometimes brings flowering plants the first season

LARKSPUR
An old time annual of branching erect habit, having showy red, white and blue flowers during the entire summer. Good for cut flowers

LOBELIA
Exceedingly pretty plants, both for edgings to garden borders as well as for pots and hanging baskets. Their little flowers, mostly blue or blue and white, are very graceful. Seed needs little or no covering

AFRICAN MARIGOLD
MARIGOLD
These old fashioned flowers are annuals of the easiest culture. The French varieties have small, velvety flowers. African marigolds produce yellow and orange colored flowers. Fine for cutting

MIGNONETTE
(RESEDA ODOVATA)
This fragrant little plant is probably the most popular annual grown. If the plants are thinned out they will grow stronger and produce larger spikes of flowers; and can be had the whole year by sowing at intervals

MORNING GLORY (Convolvulus Major)
The best known and most popular annual climber we have. The flowers are bright, and produced in great abundance. Seed grows readily, and vines are of such rapid growth that it should be largely grown to cover unsightly fences and outhouses

MOURNING BRIDE (Scabiosa)
The plants grow about two and one-half feet high, and come into bloom early in July, continuing without interruption until the hard frosts of autumn. The exquisite double flowers are borne on very long stems, and when cut keep in perfect condition for the best part of a week. They make most effective borders or beds
NASTURTIUMS

There are few annuals which produce such a wealth of rich and various colored flowers as Nasturtiums. They are suitable for bedding and for climbers. No other will yield such a lavish profusion of flowers for so long a time with the same small outlay of time and labor. The most and largest flowers are produced in thin soils and the hottest weather does not affect the supply. In soils too rich, leaves predominate, and the plants are apt to rot off in wet weather, especially if standing too close.

Dwarf. Sow the seeds an inch deep in rows not less than one foot apart. Thin the seedlings to 10 or 12 inches apart. Mixed, ounce 10c.

Tall. These are excellent to train upon pillars, railings and trellises. Also to trail over the ground. They require more room than the dwarf varieties. Mixed, Ounce 10c.

PETUNIAS

Petunias, like pansies, are flowers for everybody. The tiny garden in the yard, or the beautiful beds seen in the parks of great cities are not complete without Petunias. They are most easily grown, and from early summer to late fall they are loaded with flowers; heat, rain or drought do not affect them. The seeds being very small would better be started in the house, afterwards transplanting the plants one foot apart in the place where they are to bloom. As pot plants Petunias have very few superiors.

PHLOX DRUMMONDI

This is a favorite with everybody. It thrives in almost any soil, blooming in the greatest profusion from June until late fall. Seed may be sown in the open ground in May, indoors or in a hotbed earlier. The seedlings should be set out about a foot apart; if too thick mildew attacks them.

Phlox Drummondii makes a very good border plant, but it shows to better advantage by placing each color in a separate bed, or in ribbons or lines of color. Good contrasts can be made by the use of scarlet, white and pink. Mixed.

PINKS

These are well-known, favorite flowers, much esteemed for their delightful fragrance. They are excellent for small beds and edgings. They flower early in summer and continue until frost. The beautiful flowers are in various colors, variegated, red, striped and some almost black.

POPpy—Annual Varieties

Very showy, free-flowering plants, making a gorgeous display of large, brilliant flowers. The seed offered contains so many varieties that the flowers show almost every imaginable color and some really beautiful forms. They run from white to deepest scarlet and crimson. Poppies are of easy culture, the seed should be sown where they are to bloom, as they are rather difficult to transplant.

RICINUS (Castor Oil Bean)

Large, luxuriant, rapid-growing foliage plants with palm-like leaves and showy fruit. In centers of beds or as single specimens in the garden these plants produce a decorative effect. Seeds sown in the open ground in May will give plants ten or twelve feet high in August or early in a favorable season.
PORTULACA
One of the best hardy annuals to grow in beds, baskets or in rockwork. Thrives in the hottest sun and is one mass of bloom all summer long. The flowers are very showy and of different colors. Delights in a sandy soil...........5

SALVIA (Flowering Sage)
These handsome bedding plants produce large, long spikes of scarlet flowers thrown well up above the foliage. A hedge or a bed of Salvias is a blaze of color during late summer and fall.......................5

TEN WEEKS STOCKS
They are equally fine for bedding, borders, massing or for pot culture. They are very thirsty plants and must be watered in dry weather. They produce blossoms in all shades of crimson, rose, lilac and white, and yield a delicious odor. The seed will germinate in about a week; the plants begin to bloom in about ten weeks.............10

SUNFLOWER
Many improvements have been made on the well-known Sunflower, the newer varieties being considered indispensable for cut flowers. In bloom from June until frost........5

SWEET WILLIAM
(Dianthus Barbatus.)
For bedding, bordering or cutting, this favorite is invaluable. Of vigorous growth and extremely easy culture, bearing fragrant masses of rich flowers.......................5

SWEET PEAS
Seeds should be sown as early as possible, in drill 6 inches deep. At the time of sowing cover only with 1 inch of soil and fill in the drill as the young plants grow, taking care not to cover the top of the plants. A deep, rich soil and a sunny situation is best.
An ounce of seed will sow a row 25 feet long. A packet will be sufficient for 6 feet of row.

NAMED SWEET PEAS.

Black Knight. Dark maroon .................. $0.05 $0.15
Blanche Ferris. Pink and white .................. $0.05 $0.15
Captain of the Blues. Purple and blue ........ $0.05 $0.15

All Colors Mixed. This mixture comprises a great variety of colors and markings and will be found much superior to the mixtures as ordinarily sold. Pkt., 5c; oz., 10c.

SPENCER. Large flowering mixed. Pkt., 5c; oz., 15c.

VERBENA

One of the most popular of bedding plants, easily grown from seed, producing stronger, more vigorous and better plants than from cuttings. Start seed in the early spring, in the house or under glass, and transplant where they are to bloom, after three or four inches of growth have been made .......................5

WILD CUCUMBER

This is the most rapid growing vine we know of. It will reach a height of 30 ft. in one season. To cover a pillar or trellis or to embellish an unsightly tree trunk, fence, or unattractive building, there is nothing which so completely fills as does this. It is thickly dotted over with pretty white, fragrant flowers, followed by quantities of ornamental and prickly seed pods.......................5

ZINNIAS (Youth and Old Age)

General favorites. Thrive in any soil. Plants form bushes two to three feet in height. The flowers of various colors, form solid heads like Dahlias.......................5
Higher Civilization Demands the Beautifying of Our Surroundings

As civilization advances, comes the larger development of beauty. If people went back to sod houses or caves, it would promote a mighty gloomy climate. The demand for beauty now comes from a community, rich as well as the poor. No man is too poor to adorn his home with the beautiful products which nature furnishes us, many of which have gone through years of improvement by man. All this points to the prophecy concerning our ultimate destiny, where the skill of the Divine Architect builds and adorns the homes of the best.

On the following pages we are offering many beautiful flowers and plants. We have aimed to select only the best of each kind, and firmly believe our customers will appreciate this.

One can hardly mis any of them. Each, in the spring comes the wonderful Iris, followed by the stately Peony; then the Gladioli furnishes a constant delight, intermingled with gorgeous perennial Phlox. Lastly comes the Dahlia to round out the season until frost. Intermingled with these

Gladiolus

These are among the easiest and most satisfactory bulbs for everybody to grow. As decorative flowers for the garden or the adornment of interiors, they have several advantages. Start to plant the bulbs in April, continuing to do so every ten days or so for succession. Set them from two to four inches deep, according to size, and about six inches apart each way. Cut the spikes when the first bloom begins to unfold. Place in water and the buds will expand beautifully and last for several days if water is changed daily. Mailed postpaid at single or dozen rates, if wanted by mail in 100 lots, add 25c per 100.

This list includes varieties chosen from hundreds of kinds now on the market. All inferior and ordinary kinds have been eliminated.

America.—Soft pink flesh, tinged with lavender. 10c each; dozen; $6.00 per 100.
Baron Hulot.—The best deep blue. 15c each; $1.20 per dozen; $10.00 per 100.
Empress of India.—A splendid rich dark red. 10c each; $1.50 per dozen; $10.00 per 100.
Glory of Holland.—One of the best white sorts with pink markings. A strong grower. 15c each; $1.20 per dozen; $8.00 per 100.
Halleys.—Early flowering, immense flowers of a deep salmon pink. 10c each; $1.00 per dozen; $7.00 per 100.

Mrs. Frank Pendleton. —One of the finest varieties yet introduced. Splendid large flowers of a deep salmon pink. 15c each; $1.50 per dozen; $10.00 per 100.
Mrs. Francis King. —Very strong growing, the color is a bright shade of pure scarlet. One of the best, 10c each; $1.00 per dozen; $7.00 per 100.
Panama.—A deeper pink than America and larger, often 4½ inches across, they have few as well. 10c each; $1.20 per dozen; $8.00 per 100.
Niagara.—The color is a rich cream deepening to a canary yellow on lower petals. The throat is striped with carmine. This is a very beautiful flower. 15c each; $1.50 per dozen; $10.00 per 100.
Princess.—Immense wide open flowers of rich, dazzling scarlet marked with white on lower portion. 15c each; $1.50 per dozen; $10.00 per 100.
Peace.—Very robust, reaching five feet. Large flower, pure white, with lilac markings on lower petals. Late bloomer. 15c each; $1.50 per dozen; $10.00 per 100.
Rhapsody.—The finest of all, flowers six inches across. 10c each; $1.50 per dozen; $10.00 per 100.
Schwaben.—The very finest yellow, vigorous growers, flowers six inches across. 15c each; $1.50 per dozen; $10.00 per 100.
War.—Rich, deep blood red, shaded crimson black. Im- mense flower and spike. Late. 20c each; $2.00 per dozen; $12.00 per 100.
One each of the above, 15 kinds, postpaid for $1.00.
Mixture of Gladiolus.—Contains a wide and beautiful as- sortment of colors, including many varieties not listed here. This mixture makes it possible to have a gladiolus collection of the very best varieties at a very small cost. 50c per dozen; $3.25 per 100, postpaid. $2.00 per 100; $25.00 per 1000 by express.

Dahlias

One of the most beautiful of the autumn flowers, stands alone in its adaptability to different uses. The plants without a blossom make an attractive picture, because of the beauty of the foliage. Succeed in any good gard- den soil, but thrives best in an open sunny situation. Plant from the last of May to the end of June, place the tuber on its side and covering six inches deep. The size of the bulb does not in any way designate the size of the flower. Some of the finest, the varieties always produce rather small bulbs. Three feet apart each way is proper planting distance. All the dahlias offered are supplied in strong dormant field grown roots.

We grow over 100 varieties of dahlias, many varieties have not large enough stocks to quote. The varieties listed here are fine growing and satisfactory to grow.

Dahlia prices are prepaid. To obtain the dozen price mul- tiply the single price by 10.

Cactus Dahlias.—Long narrow petals

Advance.—Immense flowers. Straight petal type Bright- est fiery-scarlet, base tinged yellow. Each 25c.
Aurora.—Egg yellow shaded with rose. Each 25c.

Souvenir De Chambrier.—Carmine red. Each. 25c.

One each of the above five varieties, 90c postpaid.

Superb Dahlia Mixture.

This mixture is made up of the finest Dahlias grown, and will give you a wide range of colors. 4 for 50c; 12 for $1.50; 25 for $2.50; 100 for $8.00, delivered to your home.

Cannas do well everywhere, and will give good results in our varied climate, even under adverse conditions. A sunny position in any kind of soil, the beds spaded deeply and well decayed manure thoroughly incorporated in the soil, supplying water freely is all they demand. Set out the plants 1½ feet apart.

NOTE—No bulbs of any kind are sent out until all danger of freezing is passed.

Price 25c each; $2.50 per dozen, postpaid; $14.00 per 100 by express.

Red King Humbert.—Here we have the finest type of flower and bronze foliage. The flowers measure six inches in diameter, produced in gigantic trusses, rich brilliant orange-scarlet, with bright red markings. Broad massive foliage, of a rich coppery bronze, four to five feet.

Yellow King Humbert.—This Canna is identical with Red King Humbert except it produces yellow flowers, and has green foliage instead of bronze.

Hungaria.—The flower is a beautiful rose-pink, green foliage. 3½ feet.

Mrs. Alfred F. Conard.—The finest pink bloom, unsurpassed for planting either singly or in large beds. Beautiful salmon pink flowers, produced in great abundance. Green foliage. Four feet.

Mara.—Produces great masses of creamy white flowers. Very free flowering of robust growth, This will please anyone. Green foliage. 3½ feet.

One each of the above five varieties, postpaid, $1.60.

Irises

Fleur-de-Lis.

Irises will stand more neglect than any other flower we know of. They succeed best in rather damp situations, but will grow and do well on almost any soil. Perfectly hardy, and will remain in the ground for years. The bloom is large, fragrant, of delicate tints, and exquisite patterns. The newer varieties come in a wonderful assortment of colors. The foliage is rich evergreen color, makes splendid dense borders.

NOTE—"S" represents standards or upper petals; "F" falls or lower petals. Irises prices are prepaid. To obtain the dozen price multiply the single price by 10. We are growing over 200 varieties.

Abou Hassan.—S, deep yellow; F, velvety brown veined yellow. 15c each.

Crosset between Iris Germanica and Iris pumila. Flower earlier than German Iris. Dwarf foliage flower stems 18 inches high. Hardy growers, free flowering.

Gerda.—S. creamy yellow; F. deep creamy yellow.
Ivory.—S and F. creamy white, large flowers.
Walhalla.—S. lavender; F. wine red.
25c each; $2.50 per dozen; $12.00 per 100.

Beautiful New Japanese Iris

Japanese Iris are at their best in July and the flowers are of enormous size. They are generally flat and wide often measuring 10 to 12 inches across. In size of flower, plant, richness and beauty of pattern the Japanese are unquestionably first. The following are the cream of the Japanese Iris, and will provide a long blooming season.

Gekka-no-nami.—Early. A pure glistening white.
Kume-no-obi.—Clear purple with white halo and double edge.
Purple and Gold.—Rich violet purple, with golden throat and opal rays, ten inch flowers.

Gold Bound.—Pure white with yellow throat.
Uchi.—Beautiful caerulean blue, with white rays. Long blooming season. 25c each; $3.50 per dozen.
Price unless noted. 25c each; $2.50 per dozen. By express, $2.00 per dozen; $12.00 per 100.

HARDY PERENNIAL PLANTS.

The popularity of these old fashioned garden flowers is not surprising when one considers the many varied and pleasing changes which occur during the growing season. All of the varieties listed here are hardy, and are for permanent planting in borders or beds. Do not have to be taken up in the autumn or cooled in any way. After once established no attention is required beyond the cultivation given every outdoor planting, and the occasional dividing and replanting. Please bear in mind that all Hardy Perennials are young, transplanted field grown stock, and should not be confused with greenhouse or pot grown plants which are not hardy like field grown stock.

Price, except where noted, 25c each; $2.50 per dozen, postpaid; $15.00 per 100 by express.

Collection of Hardy Perennials.—For the convenience of customers who are not acquainted with the different varieties we offer the following collections, our selection, in good strong plants, which will with little care, keep the garden alive with flowers from early spring until late in autumn.

12 varieties, our selection, $2.00; 25, $4.50; 50, $7.00; 100, $12.00.

Archillea—Boule de Neige.—A beautiful white flowered bordered plant, height two feet. Flowers all summer.

Anchusa.—Dropmore variety. The bloom is a wonderful blue, comes early and lasts most of the season. Height, five feet. 25c each; $2.00 per dozen.

Lovely Iris

Aika.—S. white shaded lilac; F. white overlay bright lilac.
25c each.

Argus.—S. and F. dark purple, very rich. 25c each.

Attraction.—S. pale violet blue; F. deeper violet blue with veined yellow. 25c each.

Aurea.—S and F. rich chrome yellow. 25c each.

Belle Hortense.—S. white deeply frilled petunia violet; F. white lightly bordered petunia violet. 40c each.

Black Knight.—One of the latest and deepest of all colors. $1.25 each.

Blue Jay.—S. bright clear blue; F. intense darker blue. 50c each.

Cherubin.—S. pale lilac; F. pale lilac thinly veined with purple. 75c each.

Chester Hunt.—S. celestial blue; F. dark ultramarine blue with velvety overlay. 75c each.

Ciengiali Zephyr.—S and F. clear violet blue. 35c each.

Clarissima.—S. bright violet purple; F. reddish purple overlaid velvety brown. 15c each.

Dalmaries.—S. pale grey blue; F. darker, shaded violet brown.
25c each.

Darius.—S. rich canary yellow; F. lilac margined white, rich golden yellow beard. 25c each.

Dawn.—S and F. sulphur yellow, veined bronze at the throat.
50c each.

Dejazer.—S. bronze rose with golden sheen; F. bright reddish violet. brownish shadings, yellow beard. Very beautiful. $1.00 each.

Hiawatha.—S. pale lavender flushed rose; F. purple bordered lavender, veined on white at base. 75c each.

Honorablis.—S. golden; F. mahogany brown. 15c each.

Iris King.—S. Lemon yellow; F. Velvety brown with a wide border of golden yellow. 50c each.

Kharput.—S. violet; F. violet blue. 25c each.

Lohengrin.—Large and vigorous. S and F. deep violet mauve. 50c each.

Loreley.—S. light yellow; F. blue, bordered light yellow. 40c each.

Mary Garden.—S. pale yellow flushed pale lavender; F. long drooping creamy white, dotted and veined maroon. 75c each.

Pallida Dalmatica.—S. clear lavender blue; F. deep lavender—very large, a superb variety. 50c each; $3.00 per dozen.

Pfauenauge.—(peacock’s eye) S. olive yellow; F. brownish blue with a golden yellow border. 50c each.

Princess Victoria Louise.—S. light sulphur yellow; F. brownish blue with a golden yellow border. 50c each.

Rhein Nixe.—S. white; F. rich violet purple, narrow white edge. 50c each.

Rhein Nixe.—S. white; F. rich violet purple, narrow white edge. 50c each.

Mixed Iris.—Our selection of named hardy iris, wonderful color assortment. 12 for $2.00; 100 for $10.00. Splendid value for large plantings. Contains both Japanese and German sorts.
Anemone Japonica.—(Wind Flowers.)—A valuable class of hardy plants suitable for edging, massing or single specimens. Grow rapidly two to three feet and are profuse in bloom, gaining strength and beauty each year. The blooming period extends from August till mid-November. Alba—Purish white, with yellow center.

Aquilegia. (Columbine). Favorite spring and early summer plants, two feet high. Many distinct shades and combinations, running through purples, blue, red and yellow.

Hardy Asters. (Rosa). Gives a rare color effect in late perennial gardens. Color bright rosy mauve. Boltonia. (False Chamomile). Showy large, single aster like flowers. Bloom during the summer and autumn months with thousands of flowers open at one time. six feet.

Campanula. (Bellflower).—Media.—The well known Canterbury Bells. Clear blue flowers on wiry stems, from June to October. Height two to three feet.

Cereus Lancifolius Grandiflora.—Flowers are rich golden yellow, borne in great profusion nearly the entire summer.

Dianthus Barbatus.—(Sweet William).—Great richness and variety of coloring; beautifully marked. Offered in separate colors, crimson, white and pink.

Gaillardia Grandiflora.—Makes one of the prettiest displays of all perennials. Two foot tall, flowers often measure three inches in diameter. The flower center is deep maroon, bordered by petals of orange and yellow and rimmed by circles of crimson and red.

Ornamental Grasses. — (Variegated Ribbon Grass). Helianthus.—(Hardy Sunflower).—Among the most hardy perennials.

Hollyhocks.—Single or double mixed colors.

Hibiscus Moscheutos.—The fine old Swamp Rose Mallow. L. Large purplish pink flowers with large dark eye. Four to five feet.

Lychnis Viscaria Splendens.—(Lamp Flower).—Most vivid colored of any hardy perennial, almost evergreen foliage, in June and July ablaze with close spikes of crimson flowers. 30c each; $3.00 per dozen.

Pentosem Barbatos Torreyi.—(Scarlet Beard Tongue).—Close set spikes of small, brilliant, scarlet flowers on slender, nodding, three to five feet stems July and August.

Salvia.—(Meadow Sage).—Azurum.—Produces in fall sky blue flowers in great profusion. Two to three feet.

Sedum.—(Stone Crop).—Brilliant. A very useful class of plants which well in poor sandy or rocky soil. The foliage is thick and rubbery of upright growth. 18 inches high, crowned with massive dark crimson flowers very showy. 30c each; $3.00 per dozen.

Rudbeckia.—(Golden Glow).—Produces masses of Dahlia like golden yellow flowers from July until September. Three to five feet.

Yucca Filamentosa.—We class this at the head of the list among ornamental plants. The broad sword like foliage and five to six feet tall branched spikes of large fragrant, drooping creamy white flowers in June and July, makes it an effective plant for all positions. Hardy as os oak, splendid for border plantings, grouped with Iris. 35c each; $3.50 per dozen.

**HARDY PERENNIAL PHLOX.**

These showy flowers bloom freely from July until late autumn. The newer varieties are bright and showy, and add a decided charm to the garden. Perfectly hardy. Lift and divide the clumps every third year. No class of hardy plants and are more desirable than hardy Perennial Phlox. Very choice varieties offered.

We offer only strong field grown roots.

Price. Postpaid. 25c each; $2.50 per dozen. By express, $12.00 per 100.

* Bridesmaid.—Pure white, crimson carmine eye. Coquelicot.—Dwarf, brilliant orange scarlet.

* Mad Beanzon.—Bright aniline red.

* Mad P Langier.—The finest crimson grown.

* William.—Crimson.

* Panthoon.—Large flat flowers of salmon rose.

* Ryndstrom.—Large flowers similar to Paul Neyron Rose. One each of the above seven varieties. $1.50 postpaid.

**PEONIES.**

If planted in the spring it should be done as early as possible. The fall is the best time when the roots are dormant. Cover the crowns only three inches deep and do not use any fresh manure. Mere words fail absolutely flat when trying to describe these flowers. Our prices are for divided roots from three to five eyes each. Add $1 each for postage if sent by mail. The dozen price is obtained by multiplying the single price by 10.

* Dorchester.—A beautiful soft pink. Large flowers. 65c each.

* Festiva Maxima.—Immense flowers seven to eight inches in diameter, snow white with red blotches on edges of outer petals. 45c each.

* Eugene Furst.—Velvety crimson, with shadings of maroon. For Karl Druschki. (The White American Beauty).

* Pure white or large size and perfect form, in long stems.

* Giorge Lyonnaise.—Beautiful salmon yellow.

* Paul Neyron.—The deep reddish rose flower is often five inches in diameter, making it the largest of any rose in cultivation.

* Prince Camille de Rohan.—Dark velvety crimson, changing to intense maroon.

* Ulrich Brunner. —Cherry red.

Campanula
Hydrangea (Paniculata Grandiflora)

Althea. (Rose of Sharon).—A valuable tall shrub, blooms from August to October. Excellent for hedges or specimen plants. Colors pink, purple, red and white. 60c each.

Berberis. (Thunbergii).—(Japanese).—This is not the host for whee rash and can be safely planted. One of the best for lawn and border, compact and low growing, suitable for hedges or borders. The bright green oval leaves turn to brilliant shades of orange in autumn. The scarlet berries stay on most of the winter. 15 to 18 inch, 25c each; $2.50 per dozen, $15.00 per 100; 18 to 24 inch, 30c each, $3.00 per dozen, $20.00 per 100; 24 to 30 inch, 40c each, $4.50 per dozen, $25.00 per 100.

Cornus. (Dogwood)—Siberia. Height runs from eight to 10 feet, with clusters of fine white flowers, succeeded by a fall crop of ornamental berries. Stem and branches turn to blood red in winter. 50c each.

Cytisus Japonica. (Japan Quince).—Early in the spring this beautiful shrub is covered with dazzling scarlet berries, followed by small quince shaped fruits. The growth is bushy and dense with protecting thorns. 45c each; $16.00 per 100.

Deutzis. (Gracillis).—Densely bushy and dwarf growing, the drooping branches are covered with pure white flowers in May. 65c each.

Deutzias. (Pride of Rochester).—This is a large flowering Deutzia growing six to eight feet high, the large white double flowers come early in May. 60c each.

Forsythia. (Golden Bell).—Lights up the garden early in spring with masses of yellow, sometimes before the snow has gone. Grows eight to ten feet high, excellent for background grouping, and for hedges. 60c each.

Bush Honeysuckle. (Tartarica).—Makes a valuable and attractive hedge. The bright red bloom in May followed by showy berries through the fall. 65c each.

Hydrangea. (Paniculata Grandiflora).—One of the best known and valuable of all shrubs. Wonderfully attractive when laden with their massive white plumes. Blooms from August until frost. 60c each.

Lilacs. (Syringa).—Never fail to charm with their delicate beauty and fragrance. Will stand more neglect, heat and drought than any other shrub. White or purple. 65c each.

Philadelphia. (Mock Orange).—Literally covered with white flowers in small clusters early in spring. Grows four to six feet high. Very desirable for mass plantings or for hedges. 60c each.

Golden Syringa. (Aureus).—The very best golden leaved shrub, fine for contrastive growing. 65c each.

Privet. (California).—Of unusual beauty and has become the most popular of all hedge plants. Equally desirable for groups and single specimens. The rich shining leaves makes it very desirable for porch and terrace decoration. Easily pruned to any shape. 15 to 18 inch, each, 10c; per 10, 75c; per 100, $6.00. 18 to 24 inch, each, 15c; per 10, $1.00; per 100, $8.00. 24 to 36 inch, each, 30c; per 10, $1.20; per 100, $10.00. Golden Leaved Elder.—A valuable shrub for enlivening shrubbery with its golden yellow foliage. 60c each.

Spirea. (Bilardi).—A narrow dense shrub, growing six feet high, with dense panicles of rich pink flowers from July on. 60c each.

Spirea. (Van Houte).—The most satisfactory and generally used shrub in cultivation. Round and graceful producing large numbers of white flowers late in the spring. 50c each.

Viburnum Sterilis, (Common Snowball).—Bears in June great clusters of white flowers. Hardy, grows quickly, and free from all insect attacks. The foliage assumes brilliant hues in the fall. 50c each.

Weigela. (Rosa).—A splendid shrub that blooms from May to July in great profusion. Very desirable for border or specimen grouping. One of the ten most popular shrubs. 50c each.

Shrub Collection.

We offer a collection of individual specimens plants giving a great variety of foliage, color and blooming season for front yards. All are hardy and of the easiest culture. These are furnished in strong bush plants.

1 Hydrangea Paniculata Grandiflora
1 Spirea Van Houte
2 Lilacs, White and Purple
1 Althea ("Rose of Sharon")
1 Golden Syringa (Aureus)
1 Snowball
1 Deutzia. (Gracillis)
1 Weigela
1 Barberry. (Thunbergii)
1 Tartarian Honeysuckle
1 California Privet
12 Specimen plants for $3.75.

Weigela Rosso

Hardy Flowering Shrubs

Make your home grounds attractive with these hardy shrubs, the very best of their kinds. It is surprising how much a border of shrubbery and a few single specimens, artistically arranged on the lawn will increase the value of your property, not mentioning the satisfaction they will give the owner in beauty of flower and foliage. We do not think it advisable to offer mail size, as they are too small to give the satisfaction the larger and stronger plants will give. Shrubs can be planted either in the spring or fall. Shipped by express or freight at customer's expense. All strong bush plants. To obtain the dozen price multiply the single price by ten. Six at dozen rates.
Senator Dunlap

SMALL FRUITS

Strawberries

We strongly recommend shipping strawberry plants by parcel post. Succeed in any soil adapted to ordinary garden crops. Dip the plants in water as soon as received, and bury the roots in moist shady ground until ready to set out. Do not neglect this. The varieties offered are perfect flowering, requiring no pollination. 500 supplied at 1000 rates.

By mail—25 for 70c; 100 for $1.85; 1000 for $10.00.
By express—$5 for 50c; 100 for $1.50; 1000 for $9.00.

Senator Dunlap—Early, large size, long bearer and very productive.

Pride of Michigan—Medium early, large, vigorous healthy plants, enormously productive, good shipper.

Late Champion—The best late variety in this section. Excellent keeper after being picked, strong, vigorous grower, fruit is large, bright red. Early Ozark—The largest early berry grown, very healthy plant, firm fruit of great size.

EVERBEARING STRAWBERRIES.

We offer the two best varieties of this class. To obtain the largest size, and finest quality fruit in the fall, keep flowers picked off until about the first of August.

Superb—This is considered the best sort, plants strong, stand the winter well after producing a heavy crop of fruit. Fruit is large, round and smooth, ripens all over at once.

Progressive—Plants are very vigorous, much like Dunlap, and well protected by foliage. Fruit is not quite so large as Superb, but considered by many of superior quality.

Everbearing varieties by express: 25 for $1.00; 100 for $3.00; 1000 for $20.00.

Everbearing varieties by mail: 25 for $1.20; 100 for $3.35; 1000 for $21.00.

Grapes

Strong select vines. We advise shipping grape vines by parcel post, and if wanted shipped this way add 4¢ per vine when remitting.

2 year, 46c each; $4.00 per 10.
Concord—Black. Niagara—White.
Delaware—Red. Worden—Black.

Raspberries

We do not ship raspberry bushes by parcel post.

75c per 10; $5.00 per 100; $35.00 per 1000.

Kansas—Black. Cuthbert—Crimson.

Cumberland—Black. Plum Farmer—Black.

Blackberries

Strong root cuttings. If wanted by parcel post add 10% to value of order. These are two sure croppers and very hardy.

Blowers. Eldorado.
Each, 15¢; per 10, $1.00; per 100, $6.00.

Currants

If wanted by parcel post add 10% to value of order.
Each, 35¢; per 10, $3.00; per 100, $25.00.

FRUIT TREES

Stock very scarce and high. Place orders early. Send in your needs for quotations, mentioning size wanted.

Apples

Standards—50¢ each; $7.00 per 10; $65.00 per 100.
Yellow Transparent—Summer. Red Astrachan.
Sweet Bough—Summer. Red Baldwin.

Winter Banana—$1.25 each. R. I. Greening—Winter.

Pears

Standards—90¢ each; $8.00 per 10; $70.00 per 100.
Duchess—Autumn. Clapp’s Favorite—Summer.
Bartlett—Summer. Flemish Beauty—Autumn.
Seek—Autumn. Sheldon—Autumn.

Cherries

95¢ each; $8.50 per 10; $80.00 per 100.

Richmond—Sour. Windsor—Sweet.

Peaches

75¢ each; $6.00 per 10; $50.00 per 100.

Banner—October. J. H. Hale—September.

Late Crawford—September. Smack—Late September.

Plums

95¢ each; $8.50 per 10; $75.00 per 100.

Abundance. Burbank.

Lambard. Green Gauge.

Evergreens

It is best to have them shipped with bales of earth sewed in burlap. In planting do not remove the burlap. Transplanted nursery grown stock. Prices are quoted with ball and burlap delivered at freight or express office. Should be planted in the spring.

Arbor Vitae. American—2 to 3 feet, each, $1.50; 10 for $12.00.

Arbor vitae. Pyramidalis—2 to 3 feet, each, $2.00; 10 for $16.00.

Juniper Irish—2 to 3 feet, each, $2.00; 10 for $14.00.

Juniper Irish—3 to 4 feet, each, $2.50; 10 for $20.00.

Pine Austrian—2 to 3 feet, each, $2.50; 10 for $20.00.

Pine Scotch—2 to 3 feet, each, $1.75; 10 for $14.00.

Pine White—2 to 3 feet, each, $1.75; 10 for $14.00.

Pine White—3 to 4 feet, each, $2.25; 10 for $18.00.

Fir Balsam—2 to 3 feet, each, $1.75; 10 for $14.00.

Spruce. Norway—1½ to 2 feet, each, $1.25; 10 for $10.

Spruce. Norway—2 to 3 feet, each, $1.50; 10 for $12.00.

We warrant all stock to be true to name, with the explicit understanding that, should any prove otherwise, we will refund the money paid, or replace it with other stock, but we are not liable for damages beyond this. We do not guarantee the crop, as too many conditions enter into the successful growing of any crop. All nursery stock is shipped at purchaser’s risk. It will be carefully packed and delivered to forwarder in good condition, but after it is beyond our control our responsibility ceases. All stock shipped with inspection certificate showing the stock has been properly inspected and fumigated.

We advise express shipments on Fruit Trees and Evergreens.
IRON AGE
GARDEN TOOLS
Enables you to garden farm-like but without a horse. They need no introduction to farmers and market gardeners who garden for profit and they are equally known by small gardeners who garden merely for the pleasure of it, folks who want their own fresh vegetables every day. These tools are pushed ahead, a step and a thrust, while you walk upright. That tiresome back-bending that takes the pleasure out of gardening, is done away with entirely. Women, girls and boys use these tools the same as men and get the same benefits and pleasures from their use. Large, beautiful flower gardens are easily raised the "IRON AGE" way.

No. 306.—COMBINATION HILL AND DRILL SEEDER, SINGLE AND DOUBLE WHEEL HOE
The "Complete Gardener"—many thoroughly practical implementations in one; for planting in hills or drills, cultivating, weeding, hoeing, etc.
As a hill and drill seeder it opens the furrow, deposits the seed in either hills or drills, covers seed, packs soil and marks next row, all in one operation. Very easy to operate. The adjustable index permits you to drill just as much seed as you want, according to your judgment. The shut-off at your fingertips stops the waste of seed at ends of rows. Seed sowing device is simple, yet effective. The agitator is simply a revolving brush of selected bristles, which separates the seed and acts as a gentle yet positive force feed. The seed hopper can be easily and quickly removed, changing tool into the No. 301 Wheel Hoe, description of which is given in opposite paragraph. Hardwood handles with full ploshaped grips, fit the hands comfortably. Price $15.00

No. 301.—SINGLE AND DOUBLE WHEEL HOE.
As a double wheel hoe, used astride the plants; as the plants get high, used as either a double or single wheel hoe between the rows. The change from double to single wheel can be easily and quickly made. Tools furnished are adjustable on the frame to suit width of rows and kind of work. Opens and closes furrows, mides crops, cultivates, hoe to or from plants and very close to them without danger, pulverizes and levels the soil, etc. All of this is done while operator is walking forward in an upright, comfortable position. Handles adjustable for height of user. The seed hopper used on the No. 306 can be purchased for this tool, converting it into the complete combination tool No. 306, described opposite. Ploshaped handle grips. Price $11.00.

No. 320.—SINGLE WHEEL HOE.
A single wheel tool that will do any work performed by a double wheel hoe except cultivate astride the rows. Has forged steel frame, hardwood handles and wide-tired wheel. Furnished with a set of three cultivator teeth, a pair of side hoes and a landside plow. As the frame of this machine does not have the high arch, it cannot be used as a double wheel hoe, but makes an excellent single wheel hoe. Tools are adjustable on frame to suit width of rows and kind of work. All the between-the-row cultivating, furrowing, ridging, weeding, hoeing, etc., required in any home garden can be done with this tool. Will also plow in light soils. High 16-inch steel wheel, with broad 1½-inch tire, which lets it ride easily over soft ground. Hardwood handles, with full ploshaped grips. Handles adjustable for height. Price $8.00

No. 10.—WHEEL CULTIVATOR AND PLOW.
If you have never tried a wheel hoe for your garden, get one of these and see how easy it is to keep your ground under easy cultivation. A low priced tool that will always be convenient to have even if you do buy one of the other combinations later. This tool will do plowing in light soils, will open and close furrows for seed or fertilizer. Has two sizes of single teeth for work in narrow rows, a landside plow, a scuffle hoe and a set of three teeth on a bracket. The 24-inch wheel travels over rough ground easily and the full ploshaped handles can be gripped firmly and comfortably by the hands. This tool is not approached in quality by any other tool of this style on the market. Price $8.00.

If the tool you want is not shown here, write us or call for the Iron Age Garden Tool Booklet.

BABY CHICKS

We wish to call special mention to our line of baby chicks. These chicks are hatched for us under contract by one of the most foremost poultry breeders in America, a man who has been breeding standard bred poultry on a large scale for over thirty years. Do not confuse them with ordinary hatchery stock of which there is no comparison. These are high egg bred strains. If you want eggs buy stock that is bred for eggs. All flocks are culled by the Cornell system.

Shipped by prepaid parcel post, 97% safe delivery guaranteed to all points up to 1000 miles.

Single Comb Brown Leghorns: 25 for $6.50; 50 for $12.50; 100 for $22.00.

Single Comb Buff Leghorns: 25 for $7.00; 50 for $13.00; 100 for $24.00.

Bareld and White Plymouth Rocks: 25 for $8.00; 50 for $15.00; 100 for $28.00.

Owing to the heavy demand it is wise to book your orders for chicks early, then you will get them when wanted.

MISCELLANEOUS

LIBERTY BONDS AND WAR SAVINGS STAMPS.

In order that all may have an opportunity to plant extensively this season we have arranged to accept Liberty Bonds and War Savings Stamps the same as cash when applied to any article in this catalogue. We do not encourage the disposing of Liberty Bonds, still we feel that many people will take advantage of this chance to get the full value of these bonds and savings stamps.

If you do not care to order anything from our catalogue this time, will you kindly hand it to some friend or neighbor who may. It will be a great favor to us as well as he. The high cost of catalogue printing is a serious problem now, and our edition is not so large on that account.

AID IN SUGAR CONSERVATION.

Many garden and orchard products contain natural sugar—melons, sweet corn, sweet potatoes, parsnips, beets and winter squashes partially satisfy the sugar appetite.

Also give preference to foods that require minimum sugar for canning and preserving.
Ransom Farm
Poultry Department

NO ONE will question the statement that with the present prices of poultry and eggs there is real money in the business. There never was a time like the present when it paid better to keep poultry which really lay eggs during the fall and winter months in paying quantities. Don't make the mistake of keeping a lot of drones around to eat their heads off. Buy egg bred strains of poultry and you will not be disappointed in the results. For city poultry keeping where only a small flock is kept to supply fresh eggs for the table there is no breed superior to our White Wyandottes. For commercial egg propositions, and for the farmer who keeps a flock of hens for egg production the Single Comb White Leghorn is the breed generally chosen. The combination of poultry and fruit is a splendid one, and if intelligently managed, success is assured.

S. C. WHITE LEGHORNS

PLEASE NOTE. All prices quoted are postpaid unless otherwise noted. Baby chick orders should be sent in early in order to insure delivery when you want them. This is important. Chick shipments start March 15th.

S. C. WHITE LEGHORNS.—Barron blood foundation. Do not confuse Ransom Fowl Leghorns with the small flighty 2½ to 3 pound Leghorn hens so common. Our hens weigh 4 to 5 pounds each with egg records up to 282 eggs. Breeders and young stock on range. Our foundation flock was selected 6 years ago from the best breeders in America, and since that time they have been carefully selected and mated and new blood lines purchased.

Hatching eggs—$2.50 per 15; $4.00 per 30; prepaid by express $8.00 per 100; $35.00 per 500.

Baby chicks—$8.50 per 25; $12.50 per 50; $22.00 per 100; $41.00 per 200.

R. C. WHITE WYANDOTTES.—One of the best general purpose breeds of poultry, splendid layers, excellent table fowls. No danger of ever having their combs frozen on account of their rose combs.

Hatching eggs—$3.00 per 15; $5.00 per 30 prepaid. By express $10.00 per 100. Baby chicks—$7.00 per 25; $12.00 per 50; $25.00 per 100.

We guarantee safe delivery of hatching eggs, baby chicks and breeding stock. If any eggs which we ship have less than eight fertile eggs in 15 we will replace at half price, 80 per cent fertility guaranteed on all hatching eggs.

BREEDING STOCK—Cockerels and pullets $3.00 to $5.00 each. Can furnish stock net-skin. Write us when you want laying pullets and new blood. We expect to have about 1000 S. C. White Leghorn pullets to offer during the fall of 1920.

GRASS SEEDS FOR LAWNS AND PLEASURE GROUNDS

For several reasons, Fall is the best time to make new lawns or build up old ones. The ground has been thoroughly warmed by the sun so that the grass seed sprouts quickly. The sun is not so hot now that it will scorch the young shoots; the nights are cool, and the Autumn rains assist root growth to develop even under adverse surroundings.

"Perpetual Green" Lawn Mixture

A combination of various native and foreign dwarf-growing, fine-leaved grasses, carefully balanced and blended, with a view of producing a turf that will retain its rich green color throughout the entire season. Pound 50c postpaid, 5 pounds $2.00 by express.

Choice Lawn Mixture

While containing fewer and less expensive grasses than our "Perpetual Green," this is a good, well-balanced mixture which we do not hesitate to recommend. Per pound 35c postpaid, 5 pounds $1.45 by express.

Special Lawn Mixture

This mixture is composed of grasses selected irrespective of cost as representing the best low-growing, narrow-leaved varieties of fine texture and color. In preparing this "Special" mixture only seeds of the highest grades and extra heavy weight are employed. It costs more, but it’s worth more.” Seeded liberally upon good ground, well prepared, a lawn of the very highest excellence will result. Per pound 65c postpaid, 5 pounds $3.50 by express.

Shady Place Mixture

Made up of grasses selected for locations shaded by trees or buildings. Per pound 50c postpaid, 5 pounds $2.00 by express.

Mixture for Quick Effect

There is considerable demand for a grass seed that will produce a quick growing turf. For this purpose we have prepared a mixture of a few strong-perminating, vigorous-growing grasses, which will produce a turf of fair quality within a few weeks after seeding. The grasses in this mixture are mostly annuals or biennials, and such a turf could be relied upon only for one or two seasons. A permanent lawn could be secured, however, by re-seeding at any time with any of our other mixtures. Per pound 40c postpaid, 5 pounds $1.00 by express.

Terrace Mixture of Grasses

For seeding side hills, terraces, embankments, etc. A mixture of grasses whose roots penetrate deeply and bind the soil. When sowing, add to the mixture about one-fifth part of oats, which holds the soil together until the grasses have made a good start. Per pound 50c postpaid, 5 pounds $2.00 by express.

Putting Green Mixture

This mixture is intended not only for putting greens, but for all lawns that are to be used as pleasure grounds and necessarily requiring a fine, dense turf—one capable of withstand constant wear. With this in view, after experimenting with several combinations of the best fine-leaved, low-growing grasses, we selected those which, rightfully proportioned together, produced just the results we were endeavoring to obtain. Per pound 65c postpaid, 5 pounds $2.50 by express.

White Clover

The best variety for lawns. Extra fancy quality. Per pound 90c postpaid, 5 pounds $4.25 by express.
